every level of biological organization from the molecular to the community at least from the Jurassic to the present time and over every scholarly discipline in which bird biology is done to say this is merely to expand a dictionary definition of ornithology. The aim of the work to be realized over several volumes is to present reviews or position statements concerning the active fields of ornithological research. The reviews will be relatively short and often will be done from the viewpoint of a readily identified group or school. Such a work could have come into being at any time within the past fifty years but that Current Ornithology appears now is a result of events that are only seven to eight years old. One important event was the initiation in 1975-1976 of the Workshop on a National Plan for Ornithology under the directorship of James R. King and Walter J. Bock cosponsored by the American Ornithologists Union and the National Science Foundation. Part of the Workshop's interests lay in publications resources and certain kinds of information on publications were obtained by means of a questionnaire.

Mammals of Africa: Volume II Jonathan Kingdon, 2014-11-20. Mammals of Africa MoA is a series of six volumes which describes in detail every currently recognized species of African land mammal. This is the first time that such extensive coverage has ever been attempted and the volumes incorporate the very latest information and detailed discussion of the morphology, distribution, biology and evolution including reference to fossil and molecular data of Africa's mammals. With more than 1,160 species and 16-18 orders, Africa has the greatest diversity and abundance of mammals in the world. The reasons for this and the mechanisms behind their evolution are given special attention in the series. Each volume follows the same format with detailed profiles of every species and higher taxa. The series includes hundreds of colour illustrations and pencil drawings by Jonathan Kingdon highlighting the morphology and behaviour of the species concerned as well as line drawings of skulls and jaws by Jonathan Kingdon and Meredith Happold. Every species also includes a detailed distribution map. Edited by Jonathan Kingdon, David Happold, Tom Butynski, Mike Hoffmann, Meredith Happold and Jan Kalina and written by more than 350 authors, all experts in their fields, Mammals of Africa is as comprehensive a compendium of current knowledge as is possible. Extensive references alert readers to more detailed information. Volume II is edited by Thomas Butynski, Jonathan Kingdon and Jan Kalina and contains profiles of 93 species of primates; this includes the great apes, Old World monkeys, lorises and galagos.
