Description

Wheel loaders L60, L70 and L90 have articulated frame steering and four-wheel drive.

The engine is a six-cylinder, four-valve, direct injection, turbocharged diesel engine of the type D40.

The transmission is hydro-mechanical where all gears are in constant mesh. Its type designation is H71 for L60, H75 for L70 and H74SD for L90.

There is a single stage hydraulic torque converter between the engine and the transmission.

Front and rear axles have fully floating drive shafts with planetary gears in the wheel hubs. The front axle is equipped with a differential lock.

The service brakes on these machines are wet type disc brakes. The service brakes are built into each wheel hub.

The parking brake on L60 and L70 is a disc brake positioned externally on the front output shaft of the transmission. On L90, the parking brake is positioned internally on the front output shaft of the transmission.

The steering system is hydraulic with a variable load-sensing axial piston pump and two hydraulic cylinders (steering cylinders).
