SAFETY NOTICE

The following warning notes will alert you to possible bodily injury dangers and to important information on safe operation of equipment. Observe them carefully. "Warning" notes alone do not eliminate the dangers that they signal. Personal close attention to detail plus common sense operation of equipment are major accident prevention measures.

WARNING: You are warned that personal injuries, damage to property or malfunction of the engine can result from your not following these instructions.

GENERAL INFORMATION

Important information concerning the function to your engine:

FUEL

Use diesel fuel oil of quality "Autodiesel" (No 2 Diesel). Lower fuel quality can cause interruptions in operation.

LUBRICATING OIL

Use only oil with quality CD (DS) according to the API system. Volvo Penta oil for diesel engines meets these requirements.

RUNNING IN

A new engine must be run in with due care during the first 20 hours of operation. Avoid operating the engine under full load during this period. Higher oil consumption during this running in period is normal. Check the oil-level in the engine more frequently than normal during this period.

FULL THROTTLE OPERATING RANGE

When fitting a propeller to a specific boat-engine combination it is sometimes hard to select the proper sized propeller for varying load and weather conditions. Therefore Volvo Penta offers a wide range of propeller sizes and types. In some boats there are advantages to selecting a propeller that limits engine rpm including lower fuel consumption, lower noise, lower vibration and better propeller efficiency.

Full throttle operating range 2800–3200 rpm.

Recommended engine revolutions when charging the battery: 1200–1500 rpm
