What Is A Case Exploring The Foundations Of Social Inquiry:

What Is a Case? Charles C. Ragin, Howard Saul Becker, 1992-07-31 The concept of the case is a basic feature of social science research and yet many questions about how a case should be defined selected and judged are far from settled The contributors to this volume probe the nature of the case and the ways in which different understandings of the concept affect the conduct and the results of research The contributions demonstrate that the work of any given researcher is often characterised by some hybrid of these basic approaches and it is important to understand that most research involves multiple definitions and uses of cases as both specific empirical phenomena and as general theoretical categories *What is a Case?* Charles C. projects are notoriously hard to manage so it is important that society learns from the successes and mistakes made over time However most evaluation methods run into a conundrum either they cover a large number of projects but have little to say about their details or they focus on detailed single case studies with little in terms of applicability elsewhere This book presents Qualitative Comparative Analysis QCA as an alternative evaluation method that solves the conundrum to enhance learning *Model Cases* Monika Krause,2021-09-03 In *Model Cases* Monika Krause asks about the concrete material

research objects behind shared conversations about classes of objects periods and regions in the social sciences and humanities It is well known that biologists focus on particular organisms such as mice fruit flies or particular viruses when they study general questions about life development and disease Krause shows that scholars in the social sciences and humanities also draw on some cases more than others selecting research objects influenced by a range of ideological but also

mundane factors such as convenience historicist ideas about development over time schemas in the general population and schemas particular to specific scholarly communities Some research objects are studied repeatedly and shape our understanding of more general ideas in disproportionate ways The French Revolution has profoundly influenced our concepts of revolution of citizenship and of political modernity just like studies of doctors have set the agenda for research on the professions Based on an extensive analysis of the role of model cases in different fields Krause argues that they can be useful for scholarly communities if they are acknowledged and reflected as particular objects she also highlights the importance of research strategies based on neglected research objects and neglected combinations of research objects and scholarly concerns

Advances in Research on Illicit Networks Martin Bouchard, 2016-04-14 Social network analysis finally reached a critical mass of scholars in the field of criminology The proven track record of network theory and methods in fostering new advances in our understanding of crimes and criminals has extended the web of researchers willing to integrate this approach to their work It is more than just a fad once you adopt a network approach it almost inevitably becomes the main lens through which you see crime The insights learned from analysing matrices of relations among offenders from exploiting the interdependence among actors instead of finding ways to avoid it are simply too great to ignore This book provides a state of the art assessment into network research currently being conducted in criminology and beyond pushing the field further in multiple ways A series of contributions tackle themes and offending types that had yet to be previously empirically investigated including political conspiracies steroid distribution methamphetamine production illicit marketplaces on the Internet and small arms trafficking Advances are also found in the

Jasper, 2013-10-08 This book examines the puzzle of why some states acquire nuclear weapons whereas others refrain from trying to do so or even renounce them Based on the predominant theoretical thinking in International Relations it is often assumed that nuclear proliferation is inevitable given the anarchic nature of the international system Proliferation is thus often explained by vague references to states insecurity in an anarchic environment Yet elusive generalisations and grand abstract theories inhibit a more profound and detailed knowledge of the very political processes that lead towards nuclearisation or its reversal Drawing upon the philosophical and social theoretical insights of American pragmatism **The Politics of Nuclear Non Proliferation** provides a theoretically innovative and practically useful framework for the analysis of states nuclear proliferation policies Rather than recounting a parsimonious lean account of proliferation the framework allows for the incorporation of multiple paradigms in order to depict the complex political contestation underlying states proliferation decisions This pragmatist framework of analysis offers ways of overcoming long standing metatheoretical gridlocks in the IR discipline and encourages scholars to reorient their efforts towards imminent real world challenges This book will be of much interest to students of nuclear proliferation international security and IR theory **Black**

middle-class Britannia Ali Meghji, 2019-10-17 This book analyses how racism and anti racism affects Black British middle class cultural consumption In doing so it challenges the dominant understanding of British middle class identity and culture as being beyond race Paying attention to the relationship between cultural capital and cultural repertoires Meghji argues that there are three modes of black middle class identity strategic assimilation ethnoracial autonomous and class minded Individuals within each of these identity modes use specific cultural repertoires to organise their cultural consumption Those employing strategic assimilation draw on repertoires of code switching and cultural equity consuming traditional middle class culture to maintain equality with the white middle class in levels of cultural capital Ethnoracial autonomous individuals draw on repertoires of browning and Afro centrism self selecting traditional middle class cultural pursuits they decode as

Eurocentric while showing a preference for cultural forms that uplift black diasporic histories and cultures Lastly class minded individuals draw on repertoires of post racialism and de racialisation polarising between Black and middle class cultural forms Black middle class Britannia examines how such individuals display an unequivocal preference for the latter lambasting other black people who avoid middle class culture as being culturally myopic or culturally uncultivated

Social Dynamics of the Life Course Walter R. Heinz, Victor W. Marshall, In the last two decades research on the life course has successfully combined and integrated different and rather isolated fields of social concerns such as the labor market family solidarity education employment retirement and social policy It has also developed a special focus on crucial problems of sociological research which includes the understanding of micromacro phenomena the dynamics of social change and international comparisons Contributors to this volume take an international comparative approach in applying the life course theoretical framework to issues of work and career Life course research focuses on the relationship between institutions and individuals across the life span and illuminates the impact of modernization on the shaping of biographies Industrial service societies are characterized by historically new contingencies of living arrangements and biographies These contingencies differ according to the extent to which life course patterns are regulated by social institutions In the continental European context institutional frameworks continue to define the timing and sequencing of transitions across the life course In less regulated market societies like the United States and Great Britain biographies and living arrangements are shaped more by the interaction of markets social networks and individual decisions In active welfare states institutional resources and rules continue to mediate the effects of social change on the life course What the editors and contributors to this fine compendium anticipate is a change on the cultural level toward more equality This trend supports young people and women in particular in their expectations concerning an egalitarian relationship This expectation is not taken for granted from the point of view of the male partner but has to be negotiated in decisionmaking processes as an issue that concerns the couple as a unit Thus the way in which people interact is profoundly impacted by the values and goals of equity demands Walter R Heinz is professor of sociology and social psychology and director Graduate School of Social Sciences University of Bremen Victor W Marshall is professor of sociology and director of the Institute on Aging University of North Carolina at Chapel Hill Carolina
