Wonder And Wisdom Conversations In Science Spirituality And Theology:

Wonder and Wisdom Celia Deane-Drummond, 2006 What has wonder that apparently innocent feeling of amazement so common in little children to do with wisdom often thought to be the privilege of those who are old What has theology and religious experience to do with scientific investigation of the natural world Professor Celia Deane Drummond's exploration of these themes expands the dialogue between science and religion She begins her study with reflections on the emotion of wonder tracing the history of its meaning from its Indo European roots to the present focusing on the experience of the natural world including that described by contemporary cosmology Incorporating insights from both Eastern and Western religious traditions as well as African spirituality she segues to a discussion of wisdom She considers natural wisdom looking at evolutionary convergence and design in the natural world and how it might mesh with theological understanding of natural wisdom human identity and the notion of God as wisdom She also discusses the origin of the cosmos and the role of God as creator as well as whether there is wisdom in nature and what the role if any of neuroscience in wisdom as a facet of human nature might be Returning to the theme of wonder she muses on wonder as it relates to the wisdom of God and the wisdom of the cross She shows that by weaving wonder and wisdom together a deeper spirituality can surface that integrates theology and science If wisdom is the voice for theology at the boundary of science so wonder reminds theology that science too offers its own wisdom that needs to be taken into account she concludes Wonder and Wisdom Celia Deane-Drummond, 2006

The Oxford Handbook of Religion and Science Philip Clayton, Zachary Simpson, 2006 The field of science and religion is exploding in popularity among both academics and the reading public This is a comprehensive and authoritative introduction to the debate written by the leading experts yet accessible to the general reader **Theology in a Suffering World**

Christopher Southgate, 2018-08-30 The book proposes a new way of understanding the glory of God in Christian theology based on glory as sign *Creaturely Theology* David Clough, 2013-02-11 Creaturely Theology is a ground breaking scholarly collection of essays that maps out the agenda for the future study of the theology of the non human and the post human A wide range of first rate contributors show that theological reflection on non human animals and related issues are an important though hitherto neglected part of the agenda of Christian theology and related disciplines The book offers a genuine interdisciplinary conversation between theologians philosophers and scientists and will be a standard text on the theology of non human animals for years to come Contributors include Esther D Reed Exeter Rachel Muers Leeds Stephen Clark Liverpool Neil Messer Lampeter Peter Scott Manchester Michael Northcott Edinburgh Christopher Southgate Exeter

The Nature of Things Graham Buxton, Norman C. Habel, 2016-11-16 In 2015 a conference on Rediscovering the Spiritual in God's Creation was held at the Serafino winery complex in the McLaren Vale region of South Australia The aim of the conference was not to seek consensus but to survey the landscape with a view to intentional responsible action in caring for God's creation Delegates were challenged to recognize their own worldviews and to widen their horizons to encompass the

enormity of the transcendence and immanence of God's presence in all creation. A group of leading international scholars and experts in the fields of science, ecology, theology, and ethics participated in a multidisciplinary conversation on the spiritual in creation with the aim of discovering fresh horizons with regard to creation care, liturgy, justice, and discipleship within the Christian community. The chapters in this volume reflect the diversity of perspectives summarized in The Serafino Declaration, which was crafted towards the end of the conference. This declaration, which opens the volume, outlines a range of views relating to the presence of the spiritual in creation, views that are both traditional and radical. This volume highlights the current concern over ecological destruction and finds sources of inspiration in the deepest roots of our traditions and forms of spirituality to sustain efforts towards custodianship of the land and care for God's creation. Contributors: David Rhoads, Paul Santmire, Denis Edwards, Bob White, Heather Eaton, Ernst Conradie, Vicky Balabanski, Celia Deane Drummond, Mark Worthing, Emily Colgan, Dianne Rayson, Anne Gardner, Mark Liederbach, Patricia Fox, Anne Elvey, Mick Pope.

Integral Ecology Gerard Magill, Jordan Potter, 2018-06-11. This edited book is a collection of essays presented at the 2nd annual Integrity of Creation Conference at Duquesne University, USA, and thus represents the 2nd Conference Proceedings of an annual endowed series. The title of this conference was 'Protecting Our Common Home', adopted in the title of this volume. The concept of Integral Ecology conveys the indispensable interrelation of topics, expertise, and specialties in the quest to protect the planet, whose environment may face catastrophic threat. A leitmotif throughout the book is the ecological encyclical of Pope Francis called *Laudato Si'* 'On Care for our Common Home', published in 2015. Indeed, the title of the volume refers to the phrase 'integral ecology' and the challenge to protect our common home in the encyclical. Although the inspiration for the title comes from a religious leader, the analysis engages both secular and religious perspectives on crucial issues that threaten the ecology of our planet. The sections of the book are divided into the context of the problem: environmental science, social science, religion, and ethics, and advocacy. Religion, Space, and the Environment Sigurd Bergmann, 2017-07-05. Religions often nurture important skills that help believers locate themselves in the world. Religious perceptions, practices, emotions, and beliefs are closely interwoven with the environments from which they emerge. Sigurd Bergmann's driving emphasis here is to explore religion not in relation to, but as a part of, the spatiality and movement within the environment from which it arises and is nurtured. Religion, Space, and the Environment emerges from the author's experiences in different places and continents over the past decade. At the book's heart lie the questions of how space, place, and religion amalgamate and how lived space and lived religion influence each other. Bergmann explores how religion and the memory of our past impact our lives in urban spaces, how the sacred geographies in Mayan and northeast Asian lands compare to modern eco-spirituality, and how human images and practices of moving in with and through the land are interwoven with the processes of colonization and sacralising, and the practices of power and visions of the sacred, among other topics. **Human Development and the Catholic Social Tradition** Séverine Deneulin, 2021-05-20. This book brings

development theory and practice into dialogue with a religious tradition in order to construct a new transdisciplinary vision of development with integral ecology at its heart. It focuses on the Catholic social tradition and its conception of integral human development on the one hand and on the works of economist and philosopher Amartya Sen which underpin the human development approach on the other. The book discusses how these two perspectives can mutually enrich each other around three areas: their views on the concept and meaning of development and progress; their understanding of what it is to be human; that is their anthropological vision; and their analysis of transformational pathways for addressing social and environmental degradation. It also examines how both human development and the Catholic social tradition can function as complementary analytical lenses and mobilizing frames for embarking on the journey of structural and personal transformation to bring all life systems human and non human back into balance. This book is written for researchers and students in development studies, theology and religious studies as well as professional audiences in development organizations.

Pierre Teilhard De Chardin on People and Planet Celia Deane-Drummond, 2017-07-05. Humanity's relationship to nature is central to the work of Pierre Teilhard de Chardin, an influential priest and scientist of the twentieth century. Teilhard believed that spiritual development must be viewed alongside material development and that evolutionary theory lies at the heart of humanity's understanding of its place in the world. Pierre Teilhard de Chardin on People and Planet argues that Teilhard's cosmic mysticism and intense interest in both cosmological and evolutionary sciences are highly relevant to current debates about how best to construct a meaningful spirituality. The book offers a critical revision of Teilhard's thought in the light of current debates in evolutionary science, eco-theology and environmental ethics. The essays present fresh interpretations of Teilhard's work and point to the significance of his thought in the contemporary study of science and religion.
