Handbuilt Ceramics Kathy Triplett, 2000 Written for the general reader with an interest in ceramics Handbuilt Ceramics is a big colorful and complete how to manual for shaping clay without a potter s wheel Features 8 projects complete with materials lists clear step by step instructions and detailed how to color photos **Works of Henry Clay: Introduction, by Thomas B. Reed. Life and times, by Calvin Colton. Correspondence, 1843-1851, edited by Thomas B. Stevenson** Henry Clay, 1897 *Working with Clay* Léonce Philibert, 2016-12-29 When it comes to creating a work of art there is nothing quite so visceral as being able to create something with your bare hands Sculpting clay is a very rewarding craft because it does not require a range of specialized tools or any really complicated techniques You can set your own pace In this book we will go through the basic clay working tools and clay techniques to get you started We will look at the whole process from start to finish you will learn how to prepare the clay how to mold it into the shape you want we look at doing this by hand or by wheel how to decorate it and how to fire it You will learn about the tools that you absolutely have to have and ones that are just nice to have At the end of this book you will be able to start making your own clay masterpieces and once you get started you will be hooked there is nothing nicer than being able to look at a piece of pottery or sculpture b and know that you created it from scratch on your own **Working with Clay** Susan Peterson, 2002 Susan Peterson one of the world s foremost authorities and educators in the field of ceramics and author of the classic master course The Craft and Art of Clay has thoroughly revised and updated her introductory course in ceramics Working with Clay Beautifully illustrated with full color photographs Working with Clay guides readers step by step through the creation of an object in clay Peterson offers advice informed by years of experience in the teaching and creating of ceramics From hand building to wheel throwing decorating to firing in a kiln the author details the process with beautiful full color photographs accompanying each step *The Art & Craft of Ceramics* Maria Dolors Ros i Frigola, 2006 Provides information about ceramic methods and materials for both beginners and more experienced potters **Amateur work, illustrated** , 1773 **Critical and Creative Research Methodologies in Social Work** Lia Bryant, 2016-03-09 Social work research is concerned with complex social issues closely connected to communities of people who are marginalized and oppressed This volume develops critical and creative research methodologies that place questions of social justice at their centre and take innovative approaches to collecting analysing interpreting and presenting research data The first section of the book examines textual data produced from an array of methodologies focused on the spoken and or written word These approaches allow those who are often silenced to speak by providing space and time to capture memory and meanings that may not come to light in a time driven structured research method like an interview or a questionnaire The second section of the book discusses visual methods including an examination of historical artefacts like photographs and objects and participant engagement with art specifically clay sculpture and drawings Both sets of methods examine the concept of time that is how we understand time as in our past

memories how we develop relationships and knowledge over time These creative and critical methods provide new insights into ways of undertaking social research in social work which captures the complexity of social experiences problems and meanings that are more often than not embedded in time and place
