Pentsov, 2007-10-31 The importance of international maritime labour law both as a component of international maritime law and in socio political and economic terms has been recognised by the IMO International Maritime Law Institute for a number of years Indeed the Institute has annually organised a course on maritime labour law with the participation of inter alia the International Maritime Organization the International Labour Organization the International Transport Workers Federation and the German Shipowners Association It was therefore a great pleasure

when the authors invited me to introduce their forthcoming monograph on Maritime Work Law Fundamentals Responsible S
 powners Reliable Seafarers As the title suggests a fundamental challenge of this branch of international maritime law is to
 achieve a balance between the interests of the two main stakeholders Institutionally the effort to achieve this balance dates
 back a number of decades with its genesis mainly found in the work of the International Labour Organization It has to be said
 that whilst this effort achieved great progress it has led to a haphazard plethora of legal instruments *Working with the
