Dijkzeul,2015-02-11 It has become commonplace to observe the growing pervasiveness and impact of Non Governmental Organizations NGOs And yet the three central approaches in International Relations IR theory Liberalism Realism and Constructivism overlook or ignore the importance of NGOs both theoretically and politically Offering a timely reappraisal of NGOs and a parallel reappraisal of theory in IR the academic discipline entrusted with revealing and explaining world politics this book uses practice theory global governance and new institutionalism to theorize NGO accountability and analyze the history of NGOs This study uses evidence from empirical data from Europe Africa Latin America the Middle East and Asia and from studies that range across the issue areas of peacebuilding ethnic reconciliation and labor rights to show IR theory has often prejudged and misread the agency of NGOs Drawing together a group of leading international relations theorists this book explores the frontiers of new research on the role of such forces in world politics and is required reading for students NGO activists and policy makers Civil Society, the Third Sector and Social Enterprise Jean-Louis Laville,Dennis R. Young,Philippe Eynaud,2015-04-24 If the twentieth century was only focused on the complementarity and the opposition of market and state the twenty first century has now to deal with the prominence of the third sector the emergence of social enterprises and other solidarity hybrid forms The concept of civil society organisations CSOs spans this diversity and addresses this new complexity The first part of the book highlights the organizational dimensions of CSOs and analyses the growing role of management models and their limits Too often the study of CSO governance has been centered on the role of the board and has not sufficiently taken into account the different types of accountability environments Thus the conversation about CSO governance rises to the level of networks rather than simple organizations per se and the role of these networks in setting the agenda in a democratic society In this perspective the second part emphasizes the institutional dimensions of CSO governance by opening new avenues on democracy First the work of Ostrom about governing the commons provides us new insights to think community self governance Second the work of Habermas and Fraser opens the question of deliberative governance and the role of public sphere to enlarge our vision of CSO governance Third the concepts of substantive rationality and economy proposed respectively by Ramos and Polanyi reframe the context in which the question can be addressed Lastly this book argues for a stronger intercultural approach useful for the renewal of paradigms in CSOs research This book has for objective to present a unique collective work in bringing together 33 authors coming from 11 countries to share perspectives on civil society governance and will be of interest to an international audience of researchers and policy makers Non-Governmental Organisations and the Law Domenico Carolei,2023-05-11 This book examines accountability issues and the problems of regulating non governmental organisations NGOs through self regulation It focuses on methods of self regulation for NGOs in response to prominent scandals that revealed problems with their accountability notably the Mafia Capitale scandal in Italy and the Oxfam GB scandal in Haiti It also touches upon other accountability failures including the allegations against the WWF of facilitating human rights abuses of indigenous groups in

Cameroon The work brings a legal approach to the topic of NGO self regulation and accountability contributing to the academic and policy debate in several ways It advances a brand new theoretical model to explain the reasons behind NGOs non compliance with self regulation examines the reasons for self regulation failures identifies new accountability routes and recommends proposals for sectoral reform The book will be of great interest to scholars researchers and PhD students who work in the area of NGO regulation and accountability from a legal perspective as well as to accountability and NGO scholars working in other disciplines It will also appeal to practitioners and policymakers who work on the development of NGO policies

Understanding Accountability: New Perspectives on a Fractured World Matthew Flinders, Gergana Dimova, Chris Monaghan, 2025-07-31 This book brings clarity and understanding to the concept of accountability through the lens of conceptual political analysis. As the structure of the modern state has become more complex, the architecture of accountability has itself needed to evolve and re-orientate in an attempt to keep pace. This has led to an increased emphasis not on accountability per se but on different kinds or types of accountability. As such, it is argued here that accountability has emerged to become a concept with adjectives and there is a real need to properly understand accountability in an increasingly fractured world. The theoretical and analytical glue that binds all of the chapters in this collection is a commitment to working within the contours of the work of the philosopher Giovanni Sartori. This is an approach that has been used to tease apart and interrogate a range of concepts including terrorism, governance, coups, gender equality, deliberation, warfare, clientelism, hybrid regimes, democracy, right through to art, love, rape and violence. It is also an approach that facilitates the cultivation of complex debates concerning the limits of conceptual flexibility. The volume consists of twelve chapters grouped into three main parts. The introductory part provides the foundations for the collection. Part I on Power explores the normative dimensions of accountability as a means to control and regulate power. Part II on Politics focuses inter alia on accountability following a period of crisis and the emergence of new technology such as algorithms. The final part, Part III on Particularities, looks at concepts such as social accountability and what is meant by supplementary accountability. This broad-ranging collection increases the conceptual toolkit that social and political scientists and lawyers can use to interrogate change at a number of levels and in a range of sectors. Whether through a focus on moral, individual or gendered accountability or through a shift towards clashing stakeholder or social accountability, there is a clear flow and coherence through the chapters. The volume will be of interest to academics and researchers working in the areas of Legal and Political Theory, Legal and Political Philosophy and Accountability Studies. [Routledge Handbook of Peace, Security and Development](#) Fen Osler Hampson, Alpaslan Özerdem, Jonathan Kent, 2020-06-04 This Handbook offers a comprehensive examination of the peace, security and development nexus from a global perspective and investigates the interfaces of these issues in a context characterised by many new challenges. By bringing together more than 40 leading experts and commentators from across the world, the Handbook maps the various research agendas related to these three themes, taking stock of existing work and debates while outlining areas for further engagement. In doing so, the chapters may serve as a primer for new researchers while also informing the wider scholarly community about the latest research trends and innovations. The volume is split into three thematic parts: Concepts and approaches; New drivers of conflict, insecurity and developmental challenges; Actors, institutions and processes. For ease of use and organisational consistency, each chapter provides readers with an overview of each research area, a review of the state of the literature, a summary of the major debates and promising directions for future research. This Handbook will be of much interest to students of peace and
