philosophers such as Sandra Harding Helen Longino Genevieve Lloyd and others Each chapter ends with a list of study questions and readings for further study **Tax Reform Proposals** United States. Hearings United States. Congress. House. Committee on Armed Services, *Introspection and Consciousness* Declan Smithies,Daniel Stoljar,2012-07-11 The topic of introspection stands at the interface between questions in epistemology about the nature of self knowledge and questions in the philosophy of mind about the nature of consciousness What is the nature of introspection such that it provides us with a distinctive way of knowing about our own conscious mental states And what is the nature of consciousness such that we can know about our own conscious mental states by introspection How should we understand the relationship between consciousness and introspective self knowledge Should we explain consciousness in terms of introspective self knowledge or vice versa Until recently questions in epistemology and the philosophy of mind were pursued largely in isolation from one another This volume aims to integrate these two lines of research by bringing together fourteen new essays and one reprinted essay on the relationship between introspection self knowledge and consciousness **The Mathematician Sophus Lie** Arild Stubhaug,2013-03-09 Sophus Lie 1842 1899 is without doubt one of Norway s greatest scientific talents His mathematical works have made him famous around the world no less than Niels Henrik Abel The terms Lie groups and Lie algebra are today part of the standard mathematical vocabulary In his comprehensive biography the author Arild Stubhaug let us come close to both the person Sophus Lie and his time We follow him through childhood at the vicarage in Nordfjordeid his growing up in Moss school and studying in Christiania travelling in Europe and his contacts with the leading mathematicians of his time The academic and scientific career brought Lie from Christiania to Leipzig as professor before the attempt to call him back to Norway when she stood on the threshold to national sovereignty was successful Light of Consciousness Martin Odudukudu,2011-07-21 Summary Light of Consciousness Metaphysics is a controversial subject because its concepts are not the same as and do not follow the same process of thinking as in other subjects to think metaphysically one must thinks out of the box one must think independently of object and objective experiences and this has to be learned In metaphysics one separates experiences due to objects from experiences occurring independently of objects Such thinking is unusual different from everyday thinking processes Otherwise one does not for example separate characterization one ascribes to God or absolute intelligence from ground of such characterization Empiricists often insist that there is no such thing as an experience independent of an object yet they

do not explain the objects if any that one perceives conceive and represents as corresponding to experiences of time space self consciousness and so on In Critic of Pure Reason Kant 1781 1787 sees nature as subject to necessary law These laws Kant would say are accessible to us because cognition of these laws depends on the subject of thinking who characterizes its perceptions of nature according to rules Thinking and characterizing the problem that arises from this way of framing subjective and objective relationship is answering the question what and how must the subject be in order to operate as a part of or apart from nature and still be said to determine it Kant s answer to this dilemma is to split nature into sensuous objects and intelligible things as they are in themselves realm however he does not explain how the intelligible connects with the objective realm independent of thinking that is how one an object can determines an object In view of these problems Light of Consciousness is intended to achieve two main goals 1 in chapter one we attempt to point out the cognition with its elements in virtue of which Metaphysics may also ascend its throne as a legitimate subject matter Here just as cognition of external object is cognition of objective relations or physics the object of cognition in metaphysics consist of objects of inner sense of which a subject of inner sense has been repeatedly identified as the aspect of inner sense saddled with the task of thinking and therefore not objective However the controversy in Metaphysics is that a subject of inner sense is objective or empirical therefore to say that without experience there is no self Light of Consciousness is intended to address these problem not by merely laying claims to its existence but also by pointing out its instances of and in occurrence In the other chapters of the book we seek to point out some of the important topics of metaphysics and to show how these topics help to further simply the subject matter We describe these various aspects of the subject matter of metaphysics and their various elements and how these relate to self We attempt to show that the operation of standing away from thinking is a real activity unique to the human being In the chapter of time and space we attempt to explicate its constituents as they relate to self In the chapter on Monad we went further to establish the natures of primary elements of nature by explicating a process of development of pure and objective consciousness and their processes Finally in the chapters on consciousness and thought we attempt to describe and explicate elements constitution and process of operations of pure and objective consciousness Here we explain what consciousness is what it consists of Most important we attempt to identify the nature of a consciousness in virtue of which one determine a representation of time and space and to differentiate this from a consciousness in virtue of which one determines and represents an object in time and space
