Tillich and World Religions Robison B. James,2003 The importance of Paul Tillich for understanding not only Christian faith but all religious systems is still being realized Tillich is widely recognized as the theologian of the modern age or as many would have it the postmodern age For a new age of preoccupation with interreligious encounters wherein tolerance may be the watchword but the quest for truth and faith maintains Robison James reintroduces Tillich as an effective pedagogue for dealing with such encounters and for discovering in the clamor of so many noisy insistent religious systems a voice of truth James has reread Tillich with the specific purpose of discovering how we may deal with the many kinds of interreligious encounters that have been growing in frequency and importance Such encounters James points out range from reading about another religion to visiting the other s observances to dialogue with its members to simply puzzling over how my faith or nonfaith relates to this or that religion Tillich s lifelong existential encounter with religious systems and his perceptive appraisal of those systems James concludes can lead us to the best attitude for our own quest for a way of faith and life among so many ways clamoring for our attention Tillich s theology James suggests may best be understood as a synthesis of dialectics and paradox Further James contends the attitude most characteristic of Tillich s thought reciprocal inclusivism is to be recommended as the best attitude for our own quest for the word of truth among so many noisy voices

Religious Diversity--What's the Problem? Rita M. Gross,2014-04-24 Once upon a time on grounds of both religion and common sense people assumed that the earth was flat and that the sun literally rose and set each day When newly developing knowledge made those beliefs untenable giving them up was difficult Today the belief that only one of the world s various religions is true for all people on earth is equivalent to the belief in a flat earth Both notions have become untenable given contemporary knowledge about religion Even though many people are still troubled by the existence of religious diversity today that diversity is a fact of life Religious diversity should be no more troubling to religious people than the fact that the earth is round and circles the sun This provocative book based on the author s longtime practice of Buddhism and comparative study of religion provides tools with which one can truly appreciate religious diversity as a gift and resource rather than as a deficiency or a problem to be overcome After we accept diversity as inevitable and become comfortable with it diversity always enriches life both nature and culture

Experience, Culture and Religion in Systematic Theology Edmond Zi-Kang Chua,2023-01-01 Most systematicians take as their starting point the nature of God and scripture as the means by which God s nature is revealed but what would a systematic theology look like that began with an experiential knowledge of God Here Edmond Chua offers a method for just such an approach Beginning with realms of human experience including psychology cultural diversity and religious plurality he builds the framework of a systematic theology that is inclusive and pluriform while retaining the core tenets of a Christian doctrine of God Notwithstanding his novel methodology Chua s argument remains biblically rooted and appreciative of the Christian tradition In the latter half of the book he returns to the classical doctrines of the Trinity Christology evil sin and salvation allowing his inclusive view of the human religious experience to shed new light on the wisdom bequeathed by Paul Augustine

Aquinas Luther Barth and others The result is a bold Christian vision that is culturally engaged and globally applicable of interest to systematic theologians while contributing to interreligious dialogue **World Religions** Casey

Religions Brandon Toropov,Luke Buckles,2004 Two comparative theologians offer a comprehensive look at ideas about God in every corner of the globe **Ninian Smart on World Religions: Religious experience and philosophical analysis. I.**

Autobiographical. 'Methods in my life' Ninian Smart,2009 Ninian Smart came to public prominence as the founding Professor of the first British university Department of Religious Studies in the late 1960s His pioneering views on education in religion proved hugely influential at all levels from primary schools to academic teaching and research An unending string of publications many of them accessible to the general public sustained a reputation that became worldwide Here for the first time a selection of Ninian Smart s wide ranging writings is organised systematically under a set of categories which both comprehend and also illuminate his varied output over a career spanning half a century The editor John Shepherd was Principal Lecturer in Religion and Philosophy at the University of Cumbria He first met Smart as a postgraduate student and recently helped establish the Ninian Smart Archive at the University of Lancaster *Irreconcilable Differences?* Jason C.

Robinson,David Peck,2015-03-17 What if philosophy theology and science spent a little more time together These fields often seem at odds butting metaphysical heads Instead of talking at how about talking with one another This book engages three academic disciplines distinct yet sharing much in common in a slice of conversation and community in which participants have aimed at validating the other and the way the other sees the world The result is a collection of essays united by a thread that can be hard to find in academia In bringing together a wide range of contributors on a project that at first seemed unlikely *Irreconcilable Differences* is also a testament to the spirit of cooperation and hard work evidence that small acts and events can make a big difference and that sometimes all you need in order to make something good happen is an idea with a little support along the way The editors of this collection are hopeful that its contributors and readers will keep looking for ways to bridge academic social and political gaps We need to forge relationships based on personal knowledge and proper

confidence seeking to make meaningful claims in an increasingly complex world *What is Life? On Earth and Beyond*
Andreas Losch, 2017-07-13 Approaches from the sciences philosophy and theology including the emerging field of
astrobiology can provide fresh perspectives to the age old question what is life Has the secret of life been unveiled and is it
nothing more than physical chemistry Modern philosophers will ask if we can even define life at all as we still don't know
much about its origins here on Earth Others regard life as something that cannot simply be reduced to just physics and
chemistry while biologists emphasize the historical component intrinsic to life on Earth How can theology constructively
interpret scientific findings Can it contribute constructively to scientific discussions Written for a broad interdisciplinary
audience this probing volume discusses life intelligence and more against the background of contemporary biology and the
wider contexts of astrobiology and cosmology It also considers the challenging implications for science and theology if
extraterrestrial life is discovered in the future **God-- the World's Future** Ted Peters, 2015 God The World's Future has
been a proven and comprehensive textbook in systematic theology for over twenty years Explicitly crafted to address our
postmodern context Peters explains the whole body of Christian historical doctrine from within a roleptic framework whereby
the gospel is understood as announcing the pre actualization of the future consummation of all things in Jesus Christ Peters
skillfully deploys this concept not only to organize the various theological areas or loci but also to rethink doctrines in light of
key postmodern challenges from ecumenism critical historical thinking contemporary science and gender and sexuality
issues The Third Edition is thoroughly revised with updated chapters additional chapters updated annotations and
bibliographies and further elaborations in light of recent developments in method and theological reflection This classic text
opens up systematic theology in new dimensions retrieving traditional categories and topics for a new generation of students
and learners to give a fresh reading of Christian theology and articulation of the liberating message of the gospel of God's
grace for the future of the world
