articulating discourses of wonder as a broad social strategy In this respect it is important to remember that many of these monuments were erected very early in the Neolithic and as a consequence of new people entering new lands or social transformation In short dolmens are monumental constructions employing experimental and emergent technologies to raise huge stones which once built enchant those who come within their spaces Our claim is that dolmens were megalithic installations of affect magical and extraordinary in construction and strategically positioned to induce both drama and awe in their encounter
