Word Meaning and Montague Grammar D. R. Dowty, 2012-12-06 The most general goal of this book is to propose and illustrate a program of research in word semantics that combines some of the methodology and results in linguistic semantics primarily that of the generative semantics school with the rigorously formalized syntactic and semantic framework for the analysis of natural languages developed by Richard Montague and his associates a framework in which truth and denotation with respect to a model are taken as the fundamental semantic notions I hope to show both from the linguists and the philosophers point of view not only why this synthesis can be undertaken but also why it will be useful to pursue it On the one hand the linguists decompositions of word meanings into more primitive parts are by themselves inherently incomplete in that they deal only in distinctions in meaning without providing an account of what meanings really are Not only can these analyses be made complete by a model theoretic semantics but also such an account of these analyses renders them more exact and more readily testable than they could ever be otherwise

Word Meaning and Montague Grammar David R. Dowty, 1979 *The Nature of Syntactic Representation* Pauline Jacobson, G.K. Pullum, 2012-12-06 The work collected in this book represents the results of some intensive recent work on the syntax of natural languages The authors differing viewpoints have in common the program of revising current conceptions of syntactic representation so that the role of transformational derivations is reduced or eliminated The fact that the papers cross refer to each other a good deal and that authors assuming quite different frameworks are aware of each others results and address themselves to shared problems is partly the result of a conference on the nature of syntactic representation that was held at Brown University in May 1979 with the express purpose of bringing together different lines of research in syntax The papers in this volume mostly arise out of work that was presented in preliminary form at that conference though much rewriting and further research has been done in the interim period Two papers are included because although they were not given even in preliminary form at the conference it has become clear

since then that they interrelate with the work of the conference so much that they cannot reasonably be left out Gerald Gazdar's statement of his program for phrase structure description of natural language forms the theoretical basis that is assumed by Maling and Zaenen and by Sag and David Dowty's paper represents a bridge between the relational grammar exemplified here in the papers by Perlmutter and Postal on the one hand and the Montague **Configurationality in Hungarian** Katalin E. Kiss, 2013-06-29 The purpose of this book is to argue for the claim that Hungarian sentence structure consists of a non configurational propositional component preceded by configurationally determined operator positions In the course of this various descriptive issues of Hungarian syntax will be analyzed and various theoretical questions concerning the existence and nature of non configurational languages will be addressed The descriptive problems to be examined in Chapters 2 and 3 center around the word order of Hungarian sentences Chapter 2 identifies an invariant structure in the apparently freely permutable Hungarian sentence pointing out systematic correspondences between the structural position interpretation and stressing and intonation of the different constituents Chapter 3 analyzes the word order phenomenon traditionally called sentence intertwining of complex sentences and shows that the term in fact covers two different constructions a structure resulting from operator movement and a base generated pattern with differences in constituent order operator scope and V object agreement Chapter 4 deals interpretation case assignment with the coreference possibilities of reflexives reciprocals personal pronouns and lexical NPs Finally Chapter 5 assigns structures to the two major sentence types containing an infinitive It analyzes infinitives with an AGR marker and a lexical subject focusing on the problem of case assignment to the subject as well as subject control constructions accounting for their often paradoxical simultaneously mono and biclausal behaviour in respect to word order operator scope and V object agreement *How to Show Things with Words* Rui Linhares-Dias, 2006 This book straddles the border between linguistics and philosophy to address on a sound interdisciplinary basis the narrative theoretical issue of proximal vs distal stance adoption In languages with no grammaticalized evidential systems the epistemological structure of discourse underlying perspectival oppositions is heavily dependent on the self expression of language using personae and must thereby be inferred from a well defined set of surface markers For that matter the book provides an in depth formal semantic account of tense aspect and Aktionsart supported by the cognitive processes inherent in eventuality description types Mathematical Methods in Linguistics Barbara B.H. Partee, A.G. ter Meulen, R. Wall, 2012-12-06 Elementary set theory accustoms the students to mathematical abstraction includes the standard constructions of relations functions and orderings and leads to a discussion of the various orders of infinity The material on logic covers not only the standard statement logic and first order predicate logic but includes an introduction to formal systems axiomatization and model theory The section on algebra is presented with an emphasis on lattices as well as Boolean and Heyting algebras Background for recent research in natural language semantics includes sections on lambda abstraction and generalized quantifiers Chapters on automata theory and formal languages
