Work Life Integration International Perspectives On The Balancing Of Multiple Roles:

Work-life Integration in Africa Okechukwu E. Amah, Marvel Ogah, 2021-03-19 This book examines how individuals and organizations in Africa have found ways to integrate work and life roles effectively It reflects on the notions that while many cultures have embraced women's participation in the workplace African culture has been more resistant to change thereby forcing companies and employees to invent their own solutions This presents its own set of challenges for example African organizations are generally not up to speed with the family friendly policies that are required in the modern workplace the effectiveness of such policies is questionable and there is an increasing realization that work family policies are not the only way to achieve work life integration and others may be considered such as workplace mentoring and introducing incentives With this in mind the authors consider multiple approaches to balancing work and life responsibilities with emphasis on three perspectives namely organizational individual and family and cultural The book highlights and examines the joint responsibility that organizations leaders and individuals have in achieving work life integration Secondly the book considers why work life integration initiatives fail and identifies the sources and remedies for these failures Each chapter discusses the role of the identified dimensions necessary for collective achievement of work life integration while the final chapter sets out further research avenues and a conceptual framework that brings together the findings of the book **The SAGE**

The tourism industry provides employment for literally millions of individuals. Despite global recessions, terrorist attacks and other catastrophes, this is likely to remain unchanged in the long term. Resilience of this nature helps tourism remain a major global employer in both developed and emerging economies. The important role played by tourism workers cannot be overstated; some argue that they actually define the product on offer. Accordingly, mediocre or poor performance gives rise to an unremarkable service experience or one to which customers would not return willingly. The inextricable link between the calibre and performance of staff and service delivery is a key issue for human resources management. This challenge is further complicated by a number of structural characteristics including dominance of unaffiliated small to medium sized organizations, high levels of labour turnover and a heterogeneous workforce with individuals having a wide variety of cultural differences and employment aspirations. This book accounts for the above factors using an approach which is part prescriptive and part enquiry or research oriented. In doing so, espoused HRM convention may be understood against HRM in practice. Additionally, by using this method, we hope to instil a sense of enquiry in the reader. This is a necessary intellectual asset for the future and will also allow the individual to make a positive contribution in the workplace. *Creating Balance?* Stephan Kaiser, Max Josef Ringlstetter, Doris Ruth Eikhof, Miguel Pina e
