Working Together How Workplace Bonds Strengthen A Diverse Democracy:

Working Together Cynthia Estlund, 2003-10-02 The typical workplace is a hotbed of human relationships of friendships conflicts feuds alliances partnerships coexistence and cooperation Here problems are solved progress is made and rifts are mended because they need to be because the work has to get done And it has to get done among increasingly diverse groups of co workers At a time when communal ties in American society are increasingly frayed and segregation persists the workplace is more than ever the site where Americans from different ethnic religious and racial backgrounds meet and forge serviceable and sometimes lasting bonds What do these highly structured workplace relationships mean for a society still divided by gender and race Structure and rules are in fact central to the answer Workplace interactions are constrained by economic power and necessity and often by legal regulation They exist far from the civic ideal of free and equal citizens voluntarily associating for shared ends Yet it is the very involuntariness of these interactions that helps to make the often troubled project of racial integration comparatively successful at work People can be forced to get along not without friction but often with surprising success This highly original exploration of the paradoxical nature and the paramount importance of workplace bonds concludes with concrete suggestions for how law can further realize the democratic possibilities of working together In linking workplace integration and connectedness beyond work Estlund suggests a novel and promising strategy for addressing the most profound challenges facing American society

The Democratic Aspects of Trade Union Recognition Alan Bogg, 2009-09-02 Winner of the SLS Peter Birks Prize for Outstanding Legal Scholarship 2010 The long ascendancy of pluralism and collective laissez faire as a guiding ideology of British labour law was emphatically shattered by the New Right ideology of Thatcher and Major When New Labour was finally returned to power in 1997 it did not however attempt to resurrect the pre Thatcher preference for pluralist non intervention in collective industrial relations Instead it purported to follow a Third Way A centrepiece of this new approach was the statutory recognition provision introduced in Schedule A1 TULRCA 1992 By breaking with the tradition of voluntarism in respect of recognition of trade unions New Labour sought to provide a model of collective labour law which combined legal support with control through juridification A closer study of both the history of approaches to recognition and the current provisions opens up fundamental questions as to the nature of this new model and the ones it aimed to replace This book uses political philosophy to elucidate the character of those historical approaches and the nature of the Third Way itself in relation to statutory union recognition In particular it traces the progressive eclipse of civic republican values in labour law in preference for a liberal political philosophy The book articulates and defends a civic republican philosophy in terms of freedom as non domination the intrinsic value of democratic participation through deliberative democracy and community This can be contrasted with the rights based individualism and State neutrality characteristic of the liberal approach Despite the promise of civic community in the Third Way rhetoric this book demonstrates that the reality of New Labour's experiment in union recognition was an emphatic reassertion of liberalism in the sphere of workers collective rights This is the first monograph to offer a sustained critical analysis of legal approaches to trade union recognition It will be of particular interest to labour lawyers but also a
