Disease Dispersion and Impact in the Indian Ocean World Gwyn Campbell, Eva-Maria Knoll, 2020-03-31. This volume views the study of disease as essential to understanding the key historical developments underpinning the foundation of contemporary Indian Ocean World (IOW) societies. The interplay between disease and climatic conditions, natural and manmade crises and disasters, human migration and trade in the IOW reveals a wide range of perceptions about disease etiologies and epidemiologies and debates over the origin, dispersion and impact of disease form a central focus in these essays. Incorporating a wide scope of academic and scientific angles including history, social and medical anthropology, archaeology, epidemiology and paleopathology, this collection focuses on diseases that spread across time, space and cultures. It scrutinizes disease as an object and engages with the subjectivities of afflicted inhabitants of and travellers to the IOW.

Perspectives on International Research on Science in Africa Dennis Raphael, Joachim Kapalanga, Yann Meunier, 2021-06-25. This volume represents research done at various levels of collaboration including international, continent-wide, regional and national in the fields of medical sciences, public health, science policy, science education, agriculture and economic aspects of science. Specific areas covered here include the manufacture of vaccines in Africa, preventing oral cancer in Nigeria and decreasing the disparity of childhood cancer globally. Contributions also discuss the prevention of HIV/AIDS and cancer in sub-Saharan Africa, early diagnosis of sarcoidosis, tertiary care of children and teens with type 1 diabetes in Africa, detecting obesity as a maternal, perinatal and neonatal risk factor and improving sanitation and health practices.

The British Medical Journal, 1915 **The Lancet**, 1885 Strong Hearts and Healing Hands Clifford E. Trafzer, 2021-04-06. In 1924 the United States began a bold program in public health. The Indian Service of the United States hired its first nurses to work among Indians living on reservations. This corps of white women were dedicated to improving Indian health. In 1928 the first field nurses arrived in the Mission Indian Agency of Southern California. These nurses visited homes and schools providing public health and sanitation information regarding disease causation and prevention. Over time, field nurses and Native people formed a positive working relationship that resulted in the decline of mortality from infectious diseases. Many Native Americans accepted and used Western medicine to fight pathogens while also continuing Indigenous medicine ways. Nurses helped control tuberculosis, measles, influenza, pneumonia and a host of gastrointestinal sicknesses. In partnership with the community nurses, quarantined people with contagious diseases were tested for infections and tracked; patients and contacts. Indians turned to nurses and learned about disease prevention. With strong hearts, Indians eagerly participated in the tuberculosis campaign of 1939-40 to x-ray tribal

members living on twenty nine reservations Through their cooperative efforts Indians and health care providers decreased deaths cases and misery among the tribes of Southern California A Practical Manual of Insanity for the Medical Student and General Practitioner Daniel Roberts Brower, Henry Martyn Bannister, 1902 Signed at head of t p J W Babcock
