Dobzhansky Max K. Hecht, 2012-12-06 It is not often that one has the opportunity to send a public birthday greet ing to a friend and colleague of many years and to congratulate him on having reached the age of reason In fact it happens only once and comes then as a surprise Surely it was only a few years ago that we sat together at an International Genetics Congress in Ithaca and only yesterday that we became members of the same department The eighth floor of Schermerhorn Hall had a north end where the flies were and a south end furnished with mice and in between a seminar room and laboratory There the distances were short and the doors open and the coffee pot busy But it now appears that yesterday has fallen thirty years behind and that we have grown up I find it interesting and appropriate that Dobzhansky s lifetime spans the period of maturation of the fields to which this volume is devoted This is true in a chronological sense for his birth occurred in the same year 1900 in which modern genetics began The rediscovery of Mendel s princi ples and the interpretation of the nature of heredity and variation to which this event led were necessary prerequisites to the development of evolution ary biology as presented in this collection of essays *Sleeping Sickness Bulletin ...*, 1908 [Evolution](#) Douglas J. Behavior R.F. Chapman, E.A. Bernays, J.G. Jr. Stoffolano, 2012-12-06 In the study of the physiological basis of animal behavior Vince Dethier has been a pioneer a guiding star Although his own work has centered on the blowfly and the caterpillar his interests and influence have spread far beyond the insects The breadth of this impact is indicated by the contributions from colleagues and former students in this volume These papers were originally presented at a meeting to honor Vince's 70th birthday held at the University of Massachusetts Amherst in May 1985 It was attended by friends and colleagues of all ages from many parts of the world However the picture presented by these papers is not the whole story What it does not show is the extent of Vince's interest and influence beyond the rigorous though friendly atmosphere of the research laboratory His idyllic summers in Maine have produced studies on the natural history of feeding by insects culminating in *The Tent Makers* with more to come In these studies we see his real love and dare we say understanding of the insect Vince Dethier is not concerned simply with reaching the established scientist In *To Know a Fly* he reaches out to those just beginning perhaps even to those who will never begin and provides insight both to the experimentalist's approach and to the fun of research His sense of fun and his elegant fluent writing have given us too his tongue in cheek fictional writings for children of all ages
