A Million Cars For A Billion People Gautam Sen,27-02-15 Can one car transform a nation The Ford Model T did do so a century ago when it replaced the horse brought about a revolution in agriculture became a stimulus to urbanization that eventually changed the landscape of America Though the Maruti 800 the Tata Indica the Hyundai Santro and the Maruti Alto became engines of growth for India these cars neither drove away the cow nor changed the way Indians travelled Tata s

Nano was expected to change all that and become the ultimate people's car capturing the imagination of the middle class across nations and cultures. In spite of its petite dimensions the Nano was meant to stand tall. Yet it did not. What caused it to fail and fall from grace despite being lauded as the right product at the right time and the most significant new car since the Ford Model T was introduced 100 years ago? But is it really all over or is there still hope for India's little wonder? What will the people's cars of tomorrow be like? A Million Cars for a Billion People delves into the questions, concerns and doubts as well as the many misconceptions and myths that have gathered momentum over the years about India's automotive history and the industry's mission to create a true people's car. The very first cars that came to India, the early beginnings of the industry, the nascent history of the automobile across nations like Germany, France, US, the UK, Italy, Japan and South Korea is narrated with authority and charm from the viewpoint of the quest for the ultimate people's car. **Autocar**, 2004 **Popular Mechanics**, 2005-10. Consumer Reports, 2003-02. *Making Cars More Fuel Efficient*. European Conference of Ministers of Transport, 2005. Studies show that cars use significantly more fuel per km than suggested by official certification test ratings and some argue that this gap is growing as a percentage of the tested value. This has raised concerns that national fuel efficiency and carbon dioxide emissions reduction goals will not be met and that consumers will lose faith in reported fuel economy figures. This publication analyses the fuel efficiency gap and examines technologies available that could reduce that gap and improve fuel economy as well as considering policy options for encouraging uptake of these technologies by vehicle manufacturers and in some cases by consumers themselves.
