Truth And The Absence Of Fact:

Truth and the Absence of Fact Hartry H. Field, 2001 Hartry Field presents a selection of thirteen essays on a set of related topics at the foundations of philosophy one essay is previously unpublished and eight are accompanied by substantial new postscripts Five of the essays are primarily about truth meaning and propositional attitudes five are primarily about semantic indeterminacy and other kinds of factual defectiveness in our discourse and three are primarily about issues concerning objectivity especially in mathematics and in epistemology The essays on truth meaning and the attitudes show a development from a form of correspondence theory of truth and meaning to a more deflationist perspective The next set of papers argue that a place must be made in semantics for the idea that there are questions about which there is no fact of the matter and address the difficulties involved in making sense of this both within a correspondence theory of truth and meaning and within a deflationary theory Two papers argue that there are questions in mathematics about which there is no fact of the matter and draw out implications of this for the nature of mathematics And the final paper argues for a view of epistemology in which it is not a purely fact stating enterprise This influential work by a key figure in contemporary philosophy will reward the attention of any philosopher interested in language epistemology or mathematics

Bare Facts and Naked Truths George Englebretsen, 2017-09-29 The very idea of truth as a substantial and meaningful concept has been under attack recently from advocates of New Age and postmodern theories In this book Englebretsen defends the notions of truth and objectivity as key to the scientific view of the natural world and presents an original defence of the commonsense correspondence theory of truth Englebretsen s approach overcomes the traditional difficulties of correspondence theories of truth with providing adequate and convincing accounts of truth bearers truth makers and the correspondence relation between them by taking truth bearers to be propositions and facts as constitutive properties of the world This accessibly written book surveys all of the major competing theories of truth coherence pragmatic redundancy semantic deflationary disquotational minimalist before formulating the new defence of the correspondence theory and then exploring the consequences of the theory for issues in epistemology and ontology The book concludes by showing how the idea of propositional depth can be used to dissolve the Liar paradoxes
