Turbulence in Porous Media Marcelo J. S. de Lemos, 2012-06-25 Turbulence in Porous Media introduces the reader to the characterisation of turbulent flow heat and mass transfer in permeable media including analytical data and a review of available experimental data Such transport processes occurring a relatively high velocity in permeable media are present in a number of engineering and natural flows De Lemos has managed to compile detail compare and evaluate available methodologies for modelling simulating purposes providing an essential tour for engineering students working within the field The hotly debated topic of heterogeneity and flow turbulence has never before been addressed in book format Offers an experimental approach to turbulence in porous media as it discusses disciplines that have been traditionally developed apart from each other The hotly debated topic of heterogeneity and flow turbulence has never before been addressed in book format Offers an experimental approach to turbulence in porous media as it discusses disciplines that have been traditionally developed apart from each other

Transition to Turbulence in Porous Media James D. McFarland, 1974 *Convection in Porous Media* Donald A. Nield, Adrian Bejan, 2012-11-30 Convection in Porous Media 4th Edition provides a user friendly introduction to the subject covering a wide range of topics such as fibrous insulation geological strata and catalytic reactors The presentation is self contained requiring only routine mathematics and the basic elements of fluid mechanics and heat transfer The book will be of use not only to researchers and practicing engineers as a review and reference but also to graduate students and others entering the field The new edition features approximately 1 750 new references and covers current research in nanofluids cellular porous materials strong heterogeneity pulsating flow and more

Computational Flow Modeling for Chemical Reactor Engineering Vivek V. Ranade, 2002 The book relates the individual aspects of chemical reactor engineering and computational flow modeling in a coherent way to explain the potential of computational flow modeling for reactor engineering research and practice

Computational Fluid Dynamics in Food Processing Da-Wen Sun, 2007-05-24 The implementation of early stage simulation tools specifically computational fluid dynamics CFD is an international and interdisciplinary trend that allows engineers to computer test concepts all the way through the development of a process or system With the enhancement of computing power and efficiency and the availability of affordable CF
