Comprehensive Handbook of Cognitive Therapy Hal Arkowitz, L.E. Beutler, Karen M. Simon, 2013-06-29 In reviewing the Contents of this Handbook edited by Freeman Simon Beutler and Arkowitz I am both impressed and gratified with the enormous strides made by cognitive behavior therapy since the late 1960s A perusal of the Contents reveals that it is used with adults children couples and families it is clinically appropriate for such problems as anxiety depression sexual dysfunctions and addictions and it is employed in conjunction with psychopharmacological and other psychotherapeutic interventions It was in the mid 1960s when Breger and McGaugh published an article in the Psychological Bulletin taking behavior therapists to task for using only classical and operant principles in devising their therapeutic interventions Breger and McGaugh argued that the field of learning was undergoing a major revolution paying considerably more attention to cognitive processes than had previously been the case In short they criticized the growing behavioral orientation for being limited in its exclusively peripheralistic orientation At the time behavior therapists were initially somewhat resistant to any allusion to cognitive metaphors Indeed my own initial reactions to the Breger and McGaugh article was quite negative Yet in rereading their critique many of their suggestions now seem most appealing No doubt I and my behavior colleagues lacked the appropriate cognitive set for incorporating such contradictory information Nonetheless the clinical evidence for the relevance of cognitive factors in the behavior change process was simply too compelling to ignore *Addictions Treatment for Older Adults* Kathryn Graham, Sarah J Saunders, Margaret C Flower, Carol B Timney, Marilyn White-Campbell, Anne Zeidman, 2014-06-23 Here is a detailed description of an innovative approach for treating elderly persons who have alcohol or drug problems During the past few years there has been growing recognition of the special needs of these individuals

special needs and sensibilities of this population Handbook on the Neuropsychology of Aging and Dementia Lisa D. Ravdin, Heather L.
