Americans are overweight and they're getting heavier. Other than wanting to perform invasive surgical procedures, most doctors offer little help. Their advice is usually "Eat less, exercise more," which falls back on the outdated dogma of calories in, calories out. Medical research on dieting is confusing and often contradictory. Not only are physicians unsure about which weight loss plan is best, but their patients are too. It has become an every one for him or herself situation where we're forced to experiment, hoping to hit on the magic weight loss formula by chance, and the increasing number of fad diets makes our odds of picking the right weight loss plan even less likely. Why can't the medical industry make sense of the overload of information and give us sound advice that actually enables people to lose weight and improve their health? Fortunately, recent studies have shined a new light on the subject and may finally help us understand a successful way to diet. This research proves what many men and women have learned through trial and error: some do better on a low carb diet, and others do better on a low fat diet. This is because some people have the metabolism of a hunter while others have the metabolism of a farmer. In this groundbreaking book, Dr. Mark Liponis, a leading expert in preventive and integrative medicine, will show you how to determine which type you are so that you can lose weight and improve your health at the same time. Once you know your type, you'll be on the road to successful weight loss and greater health and well-being.

The People's Pharmacy Quick and Handy Home Remedies Joe Graedon, Terry Graedon, 2011-05-17 This National Geographic guide to healing foods and natural herbal home remedies is carefully researched by the authors and conveyed in the same friendly and authoritative personality as in their popular call-in radio show. In the book, organized as Q&As between the general public and the Graedons, they report how and why such treatments work and also offer a dozen new recipes for food so good for you it serves as preventive medicine. This book contains as much information as a voluminous encyclopedia of home remedies, yet it's quick, easy, inviting, and fun to read. Presented alphabetically by ailment, and then within each of those by food or remedy, the book offers the basics of three standard diets for health, weight control, and fitness, along with a dozen new recipes for preparing food to match the diets. It includes a helpful index and cross-referencing system, making the book both a good shelf reference and an entertaining browse. This book builds on the reputation of The People's Pharmacy and adds the extra value that comes from a partnership with National Geographic.
