

Fetal development

In this phase, the embryo receives the name of fetus. The brain and the senses are developed, it starts to make voluntary movements, and the body finishes its formation to survive in the exterior. The placenta that surrounds the fetus plays an important role. Thanks to it, the fetus receives the oxygen and nutrients necessary for growth, and it stays protected from the exterior.

Between 30 and 100 cm

with the Umbilical chord measure.

UMBILICAL CHORD

It is the structure that connects the placenta with the fetus. It is the embryological, nutritional and hormonal link with the mother. It has two arteries and one vein that regulates the interchange of nutritive substances and blood.

UMBILICAL ARTERY

UMBILICAL VEIN

INVERTING POSITION

The fetus is already positioned with the head pointing down, ready to go on.

SENSES

One of the most developed senses in the fetus is hearing. It can recognize the voice of its mother.

UMBILICAL CHORD

THE HEAD

At three months, the head is still disproportionately big in relation with the rest of the body.

THE HEART

The heart of the fetus beats at a speed of between 140 and 160 beats per minute, twice as fast than the rate of an adult.

MOVEMENT 1

In the fourth month, its support is totally formed and can go gestation and make bones. Its kidneys are already working and it urinates frequently in the amniotic liquid, which is renewed each hour. It usually moves around in air.

MOVEMENT 2

The brain is already formed and functions similarly to the one of a newborn. The rest of the organs are very developed, except the lungs, which are still not ready to breathe in the exterior.

MOVEMENT 3

In most cases, the fetus positions itself in a head-down position in the eighth month. Its organs are already prepared to receive oxygen, and the placenta becomes thicker. In the last weeks of pregnancy, the fetus will grow faster.

Un Foetus Mal L Ch Trois

KJ Lindholm-Leary

Un Foetus Mal L Ch Trois:

Pratiques homéopathiques en gynécologie-obstétrique Christelle Besnard-Charvet, Antoine Demonceaux, 2019-02-19
Gynécologues obstétriciens sages femmes et bien sûr médecins généralistes ont fréquemment recours à l'homéopathie pour répondre des questions quotidiennement posées par leur pratique. Que proposer aux femmes enceintes pour les accompagner sans risque tout au long de leur grossesse et pendant l'allaitement? Quelles réponses apporter aux patientes pour lesquelles les traitements hormonaux sont formellement contre-indiqués ou simplement non souhaités? Comment aborder et traiter des pathologies désespérément récidivantes comme les cystites récurrentes ou les mycoses dans lesquelles le terrain individuel est manifestement impliqué? Quelle place pour l'homéopathie dans la prise en charge des symptômes au moment de la ménopause, bouffées de chaleur, troubles de l'humeur? Comment prendre en compte l'influence évidente de l'anxiété du psychique sur l'équilibre général sans avoir recours des médicaments psychotropes non dénués d'effets indésirables? Comment aborder les soins de support homéopathiques dans des situations courantes de traitement du cancer? Ce livre apporte des réponses concrètes et pratiques à toutes ces questions. Il se propose l'aide de stratégies thérapeutiques simples d'accompagner tous ceux qui souhaitent intégrer l'homéopathie dans leur pratique de la gynécologie-obstétrique et de guider leurs premières ordonnances.
