Writing Religion The Case For The Critical Study Of Religion:

Writing Religion Steven W. Ramey, 2015-07-30 *Writing Religion The Case for the Critical Study of Religion* is a collection of outstanding essays on wide ranging aspects of religious studies by well known scholars delivered as part of the University of Alabama's annual Aronov Lectures

The Critical Study of Non-Religion Christopher R. Cotter, 2020-07-09 This book acts as a bridge between the critical study of religion and empirical studies of religion in the real world Chris Cotter presents a concise and up to date critical survey of research on non religion in the UK and beyond before presenting the results of extensive research in Edinburgh's Southside which blurs the boundary between religion and non religion In doing so Cotter demonstrates that these are dynamic subject positions and phenomena can occupy both at the same time or neither depending on who is doing the positioning and what issues are at stake This book details an approach that avoids constructing religion as in some way unique whilst also fully incorporating non religious subject positions into religious studies It provides a rich engagement with a wide variety of theoretical material rooted in empirical data which will be essential reading for those interested in critical sociological and anthropological study of the contemporary non religious landscape

Decolonising the Study of Religion Jørn Borup, 2023-12-28 *Decolonising the Study of Religion* analyses historical and contemporary discussions in the study of religion and Buddhism and critically investigates representations possibilities and challenges of a decolonial approach addressing the important question who owns Buddhism The monograph offers a case based perspective with which to examine the general study of religion where new challenges require reflection and prospects for new directions It focuses on Buddhism one religion which has been studied in the West for centuries Building on postcolonial theories and supplemented with a critical analysis of identity and postsecular engagement the book offers new possibilities and challenges to the study of religion It critically investigates decolonisation in the study of religion subscribing to a third way between objectivist and subjectivist positions Analysing the postcolonial and decolonial critique of the study of religion with a particular focus on Buddhist studies in the West and in Japan this book will be of interest to researchers in the field of Religious Studies Buddhism Japanese religions anthropology Asian Studies and those interested in religion and decolonisation

On Making a Shift in the Study of Religion and Other Essays Russell T. McCutcheon, 2021-06-08 Although many would today argue that the onetime dominance of the phenomenology of religion has receded and with it the traditional approach to studying religion as a unique and deeply felt experience that defies explanation the essays collected here take quite the opposite stand that this approach has merely been re branded and continues to characterize much work being done in the field today Offering a different way forward one that is based on experiences gained by the members of the Department of Religious Studies at the University of Alabama a program that has successfully reinvented itself over the past 20 years the book includes a variety of practical suggestions for how members of Religious Studies departments can revise their approach to studying and teaching about religion Seeing religion instead as

mundane but always exemplary of basic social elements found all across cultures the volume argues that the way forward for this field lies not in the specialness of its object of study but instead the fact that thinking and acting as if something is special is itself an ordinary aspect of history and culture Making just this shift helps the scholar of religion to contribute to wide interdisciplinary conversations all across the Humanities and Social Sciences demonstrating the practical relevance of their work

Fabricating Religion Russell T. McCutcheon, 2018-09-24 The revised essays collected here four of which are published for the first time continue a longstanding argument made by McCutcheon and others that the study of religion would benefit from self conscious scrutiny of its tools the interests that may drive them and the effects that might follow their use The chapters examine a variety of contemporary sites in the modern field where this thesis can be argued whether involving the anachronistic use of the category religion when studying the ancient world to current interest in so called critical religion or critical realist approaches Moreover contrary to some past characterizations of such critiques a constructive way forward for the field is once again recommended and at several sites exemplified in detail redescribing not only religion as something ordinary but also our tendency to create the impression of exceptional and thus set apart things places and people Aimed at scholars and students alike the book is an invitation to examine our own scholarly practices and thereby take a more active role in shaping the field in which we carry out our work as scholars of this thing we call religion

Teaching Critical Religious Studies Jenna Gray-Hildenbrand, Beverley McGuire, Hussein Rashid, 2022-08-11 Are you teaching religious studies in the best way possible Do you inadvertently offer simplistic understandings of religion to undergraduate students only to then unpick them at advanced levels This book presents case studies of teaching methods that integrate student learning classroom experiences and disciplinary critiques It shows how critiques of the scholarship of religious studies including but not limited to the World Religions paradigm Christian normativity Orientalism colonialism race gender sexuality and class can be effectively integrated into all courses especially at an introductory level Integrating advanced critiques from religious studies into actual pedagogical practices this book offers ways for scholars to rethink their courses to be more reflective of the state of the field This is essential reading for all scholars in religious studies

An Ancient Theory of Religion Nickolas Roubekas, 2016-12-08 An Ancient Theory of Religion examines a theory of religion put forward by Euhemerus of Messene late 4th early 3rd century BCE in his lost work Sacred Inscription and shows not only how and why euhemerism came about but also how it was and still is used By studying the utilization of the theory in different periods from the Graeco Roman world to Late Antiquity and from the Renaissance to the twenty first century this book explores the reception of the theory in diverse literary works In so doing it also unpacks the different adoptions and misrepresentations of Euhemerus's work according to the diverse agendas of the authors and scholars who have employed his theory In the process certain questions are raised What did Euhemerus actually claim How has his theory of the origins of belief in gods been used How can modern scholarship approach and interpret his take on religion When referring to

euhemerism whose version are we employing An Ancient Theory of Religion assumes no prior knowledge of euhemerism and will be of interest to scholars working in classical reception religious studies and early Christian studies Nonreligion in Late Modern Societies Anne-Laure Zwingli, Helge Årsheim, 2022-06-14 This volume presents results from new and ongoing research efforts into the role of nonreligion in education politics law and society from a variety of different countries Featuring data from a wide range of quantitative and qualitative studies the book exposes the relational dynamics of religion and nonreligion Firstly it highlights the extent to which nonreligion is defined and understood by legal and institutional actors on the basis of religions and often replicates the organisation of society and majority religions At the same time it displays how essential it is to approach nonreligion on its own by freeing oneself from the frameworks from which religion is thought The book addresses pressing questions such as How can nonreligion be defined and how can the nones be grasped and taken into account in studies on religion How does the sociocultural and religious backdrop of different countries affect the regulation and representation of nonreligion in law and policymaking Where and how do nonreligious individuals and collectives fit into institutions in contemporary societies How does nonreligion affect notions of citizenship and national belonging Despite growing scholarly interest in the increasing number of people without religion the role of nonreligion in legal and institutional settings is still largely unexplored This volume helps fill the gap and will be of interest to students researchers policymakers and others seeking deeper understanding of the changing role of nonreligion in modern societies

Comparative Hagiology Massimo Rondolino, 2020-12-10 This Special Issue engages with questions of theory and methods in the comparative cross cultural study of hagiographical sources As such it offers first and foremost the venue for conducting a scientific discussion on a re definition of hagiography It also allows for the identification of shared approaches and methodologies in the study of material that may be apprehended through this categorization as an effective strategy for the study of religious phenomena To achieve this the present volume brings together a selected number of scholars whose work focuses on the theoretical study of hagiography and the historical examination of hagiographical sources In this Special Issue five core essays put forward propositions for the comparative and cross cultural re definition of hagiography to which further contributors respond eventually providing a vibrant collaborative debate on a core theoretical and methodological issue in religious studies at large

American Examples Michael J. Altman, 2021-11-16 American Examples New Conversations about Religion Volume One is the first in a series of annual anthologies published in partnership with the Department of Religious Studies at The University of Alabama The American Examples initiative gathers scholars from around the world for a series of workshops designed to generate big questions about the study of religion in America Bypassing traditional white Protestant narratives in favor of new perspectives on belief social formation and identity American Examples fellows offer dynamic perspectives on American faith that challenge our understandings of both America and religion as categories In the first volume of this exciting academic project five topically and methodologically diverse

scholars vividly reimagine the potential applications of religious history The five chapters of this inaugural volume use case studies from America broadly conceived to ask larger theoretical questions that are of interest to scholars beyond the subfield of American religious history Prea Persaud's chapter explores the place of Hinduism among the creole religions of the Caribbean while Hannah Scheidt captures what atheist parents say to each other about value systems Travis Warren Cooper explains how the modernist church architecture of Columbus Indiana became central to that city's identity Samah Choudhury dissects how Muslim American comedians navigate Western ideas of knowledge and self to make their jokes and their own selves legible and Emily D Crews uses ethnographic fieldwork to read the female reproductive body among Nigerian Pentecostal congregations Editor Michael J Altman also provides a brief rich introduction assessing the state of the discipline of religious history and how the American Examples project can lead the field forward
