Eric Loren Smoodin, 1993 Long considered children's entertainment by audiences and popular media Hollywood animation has received little serious attention Eric Smoodin's Animating Culture is the first and only book to thoroughly analyze the animated short film Usually running about seven or eight minutes cartoons were made by major Hollywood studios such as MGM Warner Bros and Disney and shown at movie theaters along with a newsreel and a feature length film Smoodin explores animated shorts and the system that mass produced them How were cartoons exhibited in theaters How did they tell their stories Who did they tell them to What did they say about race class and gender How were cartoons related to the

feature films they accompanied on the evening's bill of fare. What were the social functions of cartoon stars like Donald Duck and Minnie Mouse? Smoodin argues that cartoons appealed to a wide audience not just children and did indeed contribute to public debate about political matters. He examines issues often ignored in discussions of animated film: issues such as social control in the U.S. army's Private Snafu cartoons and sexuality and race in the sites of Betty Boop's body and the cartoon harem. Smoodin's analysis of the multiple discourses embedded in a variety of cartoons reveals the complex and sometimes contradictory ways that animation dealt with class relations, labor, imperialism, and censorship. His discussion of Disney and the Disney Studio's close ties with the U.S. government forces us to rethink the place of the cartoon in political and cultural life. Smoodin reveals the complex relationship between cartoons and the Hollywood studio system and between cartoons and their audiences.

Animation Chris Pallant, 2021-01-01. *Animation: Critical and Primary Sources* is a major multi-volume work of reference that brings together seminal writings on animation studies. Gathering historical and contemporary texts from a wide-ranging number of sources, the volumes provide a key resource in understanding and studying the past and future directions of animation studies. The four volumes thematically trace animation studies from its many definitions or a lack thereof to the institutional nature of animation production to establishing greater space within animation discourse for the consideration of broadcast and interactive animation and finally giving greater contextual understanding of the field of animation studies by focusing on Authorship, Genre, Identity, Politics, and Spectatorship, thus enabling readers to engage more deeply with the ideas discussed in the final volume. Ordering the collection in this way avoids imposing an overly simplistic chronological framework, thereby allowing debates that have developed over years and even decades to stand side by side. Each volume is separately introduced and the essays structured into coherent sections on specific themes.
