web jul 10 2015 answers 1 there are many different ways to detect and track moving objects kalman filter does assume either a constant velocity or a constant acceleration motion model however it also assumes system noise which is a way to account for the fact that the actual motion of an object does not exactly fit your model

web moving object detection and motion based tracking are important components of automated driver assistance systems such as adaptive cruise control automatic emergency braking and autonomous driving you can divide motion based object tracking into two parts detecting moving objects in each frame tracking the moving objects from
