

Essay 1

Prompt: Why do you want to go to college?

The air is tainted with unnatural fumes of grease, wood, and burnt electrical tape. Oil slicks stain the floor. Thick wooden shelves sag unnervingly close to buckling under the weight of old house paint and power tools. A workbench lies buried beneath papers, rulers, cans, and metal shards. An uncomfortable growl pours from the water heater. Most people wouldn't describe my grimy garage as pleasant, but I love spending my free time here. It's where I built a 2 ft trebuchet in sixth grade, a 4 ft trebuchet in seventh grade, and plan to build an 8 ft trebuchet this winter break. It's where I built a battlebot and slapped an Arduino microcontroller on top to give it intelligence. Ever since I sat watching jets shake the sky and explosions rock the screen in the movie Iron Man as a stunned sixth grader, I've spent weekends experimenting in my garage, trying to learn everything I can about engineering and robotics.

Sure, outside of my garage I love wildlife and hiking, history, and weird foods. I love classic rock, jazz, and maybe even secretly Katy Perry. Nevertheless, I've always had a life plan centered on robotics: go to a great college, learn robotics, build robots, get a Bernese mountain dog, and live happily ever after in a beautiful forest home. It seems strange that I've committed myself to robotics so easily despite my many interests, but in reality, robotics combines nearly all of them. Computer science, electrical engineering, and mechanical engineering are crucial to the robot, but combine them with biology, astronomy, music, or ecology, and that's when robotics becomes amazing. I could help the sick with robots that give surgeons more dexterity while operating. I could help the poor with affordable, robot-made products. I could aid the elderly, replace the limbs of wounded warriors, and keep fire fighters from harm's way, all with robots. Although these robots may not be the crimson and gold Iron Man suit that first got me interested, I love the realistic and heroic possibilities in the field of robotics.

Almost as exciting as imagining the robots I could build, is imagining where I could build them. I could become a professor and research cutting edge A.I. algorithms. I could become an entrepreneur and bring my creations to market. I could even become an employee for a tech company and devote myself to its latest innovations. Maybe next year around this time, I will even be studying on the Freshman Quad. With the LCSR robotics lab, the minor in robotics, a

Anticolonial Form Alexandra Reza, 2024-01-24 Anticolonial Form Literary Journals at the End of Empire addresses the relationship between culture and politics in two journals published in Europe by African writers Presence Africaine launched in Paris in 1947 and Mensagem published between 1948 and 1964 in Lisbon Grounded in extensive archival work the book argues for a comparative and transnational approach to postcolonial literary studies for the significance of the literary journal as a key form in the development of African writing in French Portuguese and English and for a historically and geographically contingent understanding of the relationships between literature culture and politics This book takes up the idea of articulation to bring forward the contingent and fugitive connections that networks of literary journals fostered between francophone anglophone and lusophone writers in the conjuncture of decolonization in the 1950s and 1960s It argues that comparison as a praxis and a method was central to the anticolonial charge of those journals on whose pages we see an iterative back and forth between

writing from and about different parts of the colonial world a recursive effort to establish how ideas and analyses developed in one part of the colonial world could travel and be adopted and adapted in others Many scholars have argued convincingly that the institutionalized practice of comparison in the academic field of comparative literature is itself imbricated with histories of colonialism Reza's argument takes on a particular significance in the context of that critique as the anticolonial comparison on which she focuses offers a different tradition of relational praxis from which to think about connection and comparison itself
