The Punishment Imperative Todd R. Clear, Natasha A. Frost, 2015-09-04 Clear and Frost chart the rise of penal severity in the U S and the forces necessary to end it Over the last 40 years the US penal system has grown at an unprecedented rate five times larger than in the past and grossly out of scale with the rest of the world In The Punishment Imperative eminent criminologists Todd R Clear and Natasha A Frost argue that America's move to mass incarceration from the 1960s to the early 2000s was more than just a response to crime or a collection of policies adopted in isolation it was a grand social experiment Tracing a wide array of trends related to the criminal justice system this book charts the rise of penal severity in America and speculates that a variety of forces fiscal political and evidentiary have finally come together to bring this great social experiment to an end The authors stress that while the doubling of the crime rate in the late 1960s represented one of the most pressing social problems at the time it was instead the way crime posed a political problem and thereby offered a political opportunity that became the basis for the great rise in punishment Clear and Frost contend that the public's growing realization that the severe policies themselves not growing crime rates were the main cause of increased incarceration eventually led to a surge of interest in taking a more rehabilitative pragmatic and cooperative

approach to dealing with criminal offenders that still continues to this day Part historical study part forward looking policy analysis The Punishment Imperative is a compelling study of a generation of crime and punishment in America Youth, Community and the Struggle for Social Justice Tim Goddard,Randy Myers,2017-09-25 Activists policymakers and scholars in the US have called for policy reform and evidence based efforts to decrease the number of people in jail and prison improve hostile police community relations and rollback the tough on crime movement Given that poor people particularly poor people of color make up the majority of those under carceral control in Western industrial countries can technical solutions gradual reforms and individual level programming genuinely change the deeply entrenched carceral state that has been expanding in the US for over 40 years In this book the authors offer an examination of the creative ideas that twelve US based social justice organizations put forward for how participation in social change might spur not only individual level change in young people but community wide mobilization against the harms resulting from the tough on crime movement and neoliberal policy Using alternative programs grounded in political and social consciousness raising these organizations provide important and novel methods for how we might roll back carceral expansion Their approaches resonate with scholarship in criminology and related fields however they sharply contrast with popular notions of what works The authors detail how community based organizations must navigate not only these scientific forces but the bureaucratic and financial ones consistent with neoliberal governance as well as the more formidable less navigable political barriers that activate when organizations mobilize young people of color for social and carceral reform While aware of the formidable barriers they face the authors highlight the emancipatory potential of community based social justice organizations working with the most marginalized young people across several major US cities Written in an accessible way this book will be of interest to scholars students progressive policymakers practitioners and activists and their allies who are deeply troubled by the class and racial disparities that pervade the carceral state *Recent Advancements in Education Finance and Policy* Thomas Downes,Kieran M. Killeen,2022-10-01 The past decade has seen a steady flow of important and innovative papers documenting the short and long term effects of finance reforms and the heterogeneity of the effects of reforms exemplified by papers like Jackson Johnson Persico 2016 Lafortune Rothstein Schanzenbach 2018 Hyman 2017 and Candelaria and Shores 2019 Those papers have reinvigorated research on the effects of finance reforms while raising important questions about how to best design a finance system and generate necessary revenues The papers mentioned above along with other papers too numerous to mention have taken advantage of better data and better methods to address long standing questions and generate provocative new answers Since the landscape has changed quickly policy makers and prospective researchers require a summary of the current state of the research on the effects of school finance reforms Answers are also needed to such questions as To what extent are lessons from the Great Recession applicable to the Covid 19 induced crisis For example how will states allocate cuts in grants and will those cuts undo state progress in equalizing educational access Are there

strategies for allocating resources that best preserve student learning How do financing systems need to be modified to accommodate greater use of online education How should school finance systems be designed to provide equal access or at a minimum adequate access to students with special needs Why is there significant heterogeneity in the results of different finance reforms What have been the effects of recent state efforts to reduce the role of the property tax in financing K 12 education How should finance systems be designed to more effectively close persistent achievement gaps How if at all should states integrate the financing of preschool education with the financing of elementary and secondary education To help prepare the next generation of researchers and policy makers in the realm of school finance this volume includes papers that summarize the current state of research on the questions above as well as other pressing questions in education finance and policy The book aims to bridge a space between comprehensive textbooks and journal articles in the field of education finance and policy There are two main target audiences The book is meant to serve professionals like school district administrators and education policy practitioners that desire a contemporary update to their previous study of education finance and policy issues These audiences often have limited access to peer reviewed journals and knowledge of pertinent government and related policy reports in the field The book is also meant to serve students and faculty from programs in public administration public policy community development and applied economics education administration educational leadership and policy studies that are studying content related to education policy the economics of education state and local public finance and taxation Some upper level undergraduate students may also benefit from this resource

Technology, Crime, and Justice Michael McGuire, 2012 As technology comes to characterize our world in ever more comprehensive ways there are increasing questions about how the rights and wrongs of technological use can be adequately categorized To date the scope of such questions have been limited focused upon specific technologies such as the internet or bio technology with little sense of any social or historical continuities in the way technology in general has been regulated In this book for the first time the question of technology and its relation to criminal justice is approached as a whole *Technology Crime and Justice* analyzes a range of technologies including information communications nuclear biological transport and weapons technologies amongst many others in order to pose three interrelated questions about their affects upon criminal justice and criminal opportunity to what extent can they really be said to provide new criminal opportunity or to enhance existing ones what are the key characteristics of the ways in which such technologies have been regulated how does technology itself serve as a regulatory force both in crime control and social control more widely *Technology Crime and Justice* considers the implications of contemporary technology for the practice of criminal justice and relates them to key historical precedents in the way technology has been interpreted and controlled It outlines a new social way of thinking about technology in terms of its affects upon our bodies and what they can do most obviously the ways in which social life and our ability to causally interact with the world is extended in various ways It poses the question could anything like a Technomia of technology be

identified a recognizable set of principles and sanctions which govern the way that it is produced and used principles also consistent with our sense of justice This book provides a key resource for students and scholars of both criminology and technology studies
