communication as well as those with a particular interest in mediatization convergence culture and contemporary culture

*Critique of Digitality* Jan Distelmeyer, 2022-10-12 Dealing with digitality is one of the most urgent challenges of the present The increasing importance and spread of computer technology not only challenges societies and individuals this development also puts pressure on the concept of digitality which tries to grasp the totality and peculiarity of the conditions and consequences of electronic digital computing in all its forms However precisely because digitality is commonplace so should be its critique its analysis and assessment How can an analysis do justice to both fundamental characteristics and changing concrete forms infrastructures and practices How do the developments of a digitalization that programmatically encompasses forms of networking embedding and autonomization shape media cultures and societies How do artificial intelligence and algorithmic government relate to each other how does the immateriality of the digital fit with the materiality of computers How does the changing status and scope of this technology mediate itself This book introduces ongoing debates and develops its own approach to the critique of digitality asking about forms of interfaces and processes of governance This book is a translation of the original German 1st edition *Kritik der Digitalität* by Jan Distelmeyer published by Springer Fachmedien Wiesbaden GmbH part of Springer Nature in 2021 The translation was done with the help of artificial intelligence machine translation by the service DeepL.com A subsequent human revision was done primarily in terms of content so that the book will read stylistically differently from a conventional translation Springer Nature works continuously to further the development of tools for the production of books and on the related technologies to support the authors

*Compact Cinematics* Pepita Hesselberth, Maria Poulaki, 2017-01-26 Compact Cinematics challenges the dominant understanding of cinema to focus on the various compact short miniature pocket sized forms of cinematics that have existed from even before its standardization in theatrical form and in recent years have multiplied and proliferated taking up an increasingly important part of our everyday multimedia environment Short films or micro narratives cinematic pieces or units re assembled into image archives and looping themes challenge the concepts that have traditionally been used to understand cinematic experience like linear causality sequentiality and closure and call attention to complex and modular forms of cinematic expression and perception Such forms in turn seem to meet the requirements of digital convergence which has pushed the development of more compact and mobile hardware for the display and use of audiovisual content on laptops smartphones and tablets Meanwhile contemporary economies of digital content acquisition filing and sharing equally require the shrinking of cinematic content for it to be recorded played projected distributed and installed with ease and speed In this process cinematic experience is shortened and condensed as well so as to fit the late capitalist attention economy The essays in this volume ask what this changed technical socio economic and political situation entails for the aesthetics and experience of contemporary cinematics and call attention to different concepts theories and tools at our disposal to analyze these changes

*Arts Methods for the Self-Representation of Undergraduate Students* Miranda Matthews, 2023-04-07 This
