

UC Personal Statement

There are thousands of reasons to want to attend the University of California. Not only is the weather virtually always nice, California is also home to some of the largest companies in technology and the biomedical sciences. I was attracted to the University due to all these reasons and more, but the most important distinction about the school was its diverse interdisciplinary program. As an individual that seeks to combine knowledge in multiple fields towards a single degree, it is very important for me to attend an institution with a track record of support and excellence in supporting students seeking a cross-study experience. I strongly believe that the interdisciplinary academic program at the University of California will prepare me for a successful career in Bioinformatics Engineering.

Bioinformatics Engineering is a relatively new field in which most schools do not even offer any courses. The field piqued my interest when I took a bioinformatics course over the summer at my local community college, during which it was mentioned that the algorithms developed for biological purposes often do not match the capabilities of the techniques and machines used to gather raw data. After speaking further with the professor, I learned that there was an entire field dedicated to providing a solution to this problem – bioinformatics engineering.

As a very new and cross-disciplinary field, extensive knowledge from several different areas of study is required. The University of California has nationally-acclaimed programs in bioinformatics, biology, engineering, and computer science. I hope to work with award-winning faculty to combine courses in all these areas to create a challenging curriculum which will prepare me for a career in industry. The industry connections that I will forge through applied learning experiences will also be crucial to me in obtaining a position in a leading bioinformatics company. The strong interdisciplinary program at the University of California is exactly the type of integrated and industry-savvy experience I am seeking to propel myself forward into the exciting field of Bioinformatics Engineering.
