Unto Others The Evolution And Psychology Of Unselfish Behavior:

Unto Others Elliott Sober, David Sloan Wilson, 1999-10-01 The authors demonstrate that unselfish behavior is in fact an important feature of both biological and human nature Their book provides a panoramic view of altruism throughout the animal kingdom from self sacrificing parasites to the human capacity for selflessness even as it explains the evolutionary sense of such behavior

Was Hayek Right about Group Selection After All? Review Essay of Unto Others: the Evolution and Psychology of Unselfish Behavior by Elliot Sober and David Sloan Wilson Todd J. Zywicki, Elliot

Sober, David S. Wilson, Friedrich August Hayek, 1999 *Evolutionary Origins of Morality* Leonard D. Katz, 2000 This volume

includes four principal papers and a total of 43 peer commentaries on the evolutionary origins of morality Moral Psychology Thomas Nadelhoffer, Eddy Nahmias, Shaun Nichols, 2010-10-18 *Moral Psychology Historical and Contemporary Readings* is the first book to bring together the most significant contemporary and historical works on the topic from both philosophy and psychology Provides a comprehensive introduction to moral psychology which is the study of psychological mechanisms and processes underlying ethics and morality Unique in bringing together contemporary texts by philosophers psychologists and other cognitive scientists with foundational works from both philosophy and psychology Approaches moral psychology from an empirically informed perspective Explores a wide range of topics from passion and altruism to virtue and responsibility Editorial introductions to each section explain the background of and connections between the selections

The Social Origins of Language Daniel Dor, Chris Knight, Jerome Lewis, 2014-06-27 This book offers an exciting new perspective on the origins of language Language is conceptualized as a collective invention on the model of writing or the wheel and the book places social and cultural dynamics at the centre of its evolution language emerged and further developed in human communities already suffused with meaning and communication mimesis ritual song and dance alloparenting new divisions of labour and revolutionary changes in social relations The book thus challenges assumptions about the causal relations between genes capacities social communication and innovation the biological capacities are taken to evolve incrementally on the basis of cognitive plasticity in a process that recruits previous adaptations and fine tunes them to serve novel communicative ends Topics include the ability brought about by language to tell lies that must have confronted our ancestors with new problems of public trust the dynamics of social cognitive co evolution the role of gesture and mimesis in linguistic communication studies of how monkeys and apes express their feelings or thoughts play laughter dance song ritual and other social displays among extant hunter gatherers the social nature of language acquisition and innovation normativity and the emergence of linguistic norms the interaction of language and emotions and novel perspectives on the time frame for language evolution The contributors are leading international scholars from linguistics anthropology palaeontology primatology psychology evolutionary biology artificial intelligence archaeology and cognitive science

Moving Beyond Self-Interest Stephanie L. Brown, R. Michael Brown, Louis A. Penner, 2012 *Moving Beyond Self Interest*

is an interdisciplinary volume that discusses cutting edge developments in the science of caring for and helping others In Part I contributors raise foundational issues related to human caregiving They present new theories and data to show how natural selection might have shaped a genuinely altruistic drive to benefit others how this drive intersects with the attachment and caregiving systems and how it emerges from a broader social engagement system made possible by symbiotic regulation of autonomic physiological states In Part II contributors propose a new neurophysiological model of the human caregiving system and present arguments and evidence to show how mammalian neural circuitry that supports parenting might be recruited to direct human cooperation and competition human empathy and parental and romantic love Part III is devoted to the psychology of human caregiving Some contributors in this section show how an evolutionary perspective helps us better understand parental investment in and empathic concern for children at risk for or suffering from various health behavioral and cognitive problems Other contributors identify circumstances that differentially predict caregiver benefits and costs and raise the question of whether extreme levels of compassion are actually pathological The section concludes with a discussion of semantic and conceptual obstacles to the scientific investigation of caregiving Part IV focuses on possible interfaces between new models of caregiving motivation and economics political science and social policy development In this section contributors show how the new theory and research discussed in this volume can inform our understanding of economic utility policies for delivering social services such as health care and education and hypotheses concerning the origins and development of human society including some of its more problematic features of nationalism conflict and war The chapters in this volume help readers appreciate the human capacity for engaging in altruistic acts on both a small and large scale

Bios: A Study Of Creation (With Cd-rom) Hector Sabelli, 2005-03-03 This book focuses on a prototype of creative causal processes termed BIOS and how the concept can be applied to the physical world in medicine and in social science This book presents methods for identifying creative features in empirical data studies showing biotic patterns in physical biological and economic processes mathematical models of bipolar positive and negative feedback that generate biotic patterns These studies support the hypothesis that natural processes are creative not determined and causal not random and that bipolar feedback plays a major role in their evolution Simple processes precede coexist constitute and surround the complex systems they generate priority of the simple In turn complex processes feedback and transform simpler ones supremacy of the complex

The Oxford Handbook of the Study of Religion Michael Stausberg, Steven Engler, 2016-10-27 The Oxford Handbook of the Study of Religion provides a comprehensive overview of the academic study of religion Written by an international team of leading scholars its fifty one chapters are divided thematically into seven sections The first section addresses five major conceptual aspects of research on religion Part two surveys eleven main frameworks of analysis interpretation and explanation of religion Reflecting recent turns in the humanities and social sciences part three considers eight forms of the expression of religion Part four provides a discussion of the ways societies

and religions or religious organizations are shaped by different forms of allocation of resources Other chapters in this section consider law the media nature medicine politics science sports and tourism Part five reviews important developments distinctions and arguments for each of the selected topics The study of religion addresses religion as a historical phenomenon and part six looks at seven historical processes Religion is studied in various ways by many disciplines and this Handbook shows that the study of religion is an academic discipline in its own right The disciplinary profile of this volume is reflected in part seven which considers the history of the discipline and its relevance Each chapter in the Handbook references at least two different religions to provide fresh and innovative perspectives on key issues in the field This authoritative collection will advance the state of the discipline and is an invaluable reference for students and scholars
