

URBAN REVITALIZATION

REMAKING CITIES IN A CHANGING WORLD

CARL GRODACH AND RENIA EHRENFEUCHT

Urban Revitalization Remaking Cities Changing

Ruth Massey, Ashley Gunter

Urban Revitalization Remaking Cities Changing:

Urban Revitalization Carl Grodach, Renia Ehrenfeucht, 2015-12-22 Following decades of neglect and decline many US cities have undergone a dramatic renaissance From New York to Nashville and Pittsburgh to Portland governments have implemented innovative redevelopment strategies to adapt to a globally integrated post industrial economy and cope with declining industries tax bases and populations However despite the prominence of new amenities in revitalized neighborhoods spectacular architectural icons and pedestrian friendly entertainment districts the urban comeback has been highly uneven Even thriving cities are defined by a bifurcated population of creative class professionals and a low wage low skilled workforce Many are home to diverse and thriving immigrant communities but also contain economically and socially segregated neighborhoods They have transformed high profile central city brownfields but many disadvantaged neighborhoods continue to grapple with abandoned and environmentally contaminated sites As urban cores boom inner ring suburban areas increasingly face mounting problems while other shrinking cities continue to wrestle with long term decline The Great Recession brought additional challenges to planning and development professionals and community organizations alike as they work to maintain successes and respond to new problems It is crucial that students of urban revitalization recognize these challenges their impacts on different populations and the implications for crafting effective and equitable revitalization policy Urban Revitalization Remaking Cities in a Changing World will be a guide in this learning process This textbook will be the first to comprehensively and critically synthesize the successful approaches and pressing challenges involved in urban revitalization The book is divided into five sections In the introductory section we set the stage by providing a conceptual framework to understand urban revitalization that links a political economy perspective with an appreciation of socio cultural factors in explaining urban change Stemming from this we will explain the significance of revitalization and present a summary of the key debates issues and conflicts surrounding revitalization efforts Section II will examine the historical causes for decline in central city and inner ring suburban areas and shrinking cities and building from the conceptual framework discuss theory useful to explain the factors that shape contemporary revitalization initiatives and outcomes Section III will introduce students to the analytical techniques and key data sources for urban revitalization planning Section IV will provide an in depth critical discussion of contemporary urban revitalization policies strategies and projects This section will offer a rich set of case studies that contextualize key themes and strategic areas across a range of contexts including the urban core central city neighborhoods suburban areas and shrinking cities Lastly Section V concludes by reflecting on the current state of urban revitalization planning and the emerging challenges the field must face in the future Urban Revitalization will integrate academic and policy research with professional knowledge and techniques Its key strength will be the combination of a critical examination of best practices and innovative approaches with an overview of the methods used to understand local situations and urban revitalization processes A unique feature will be chapter specific case

studies of contemporary urban revitalization projects and questions geared toward generating classroom discussion around key issues The book will be written in an accessible style and thoughtfully organized to provide graduate and upper level undergraduate students with a comprehensive resource that will also serve as a reference guide for professionals How Cities Will Save the World Ray Brescia, John Travis Marshall, 2016-06-03 Cities are frequently viewed as passive participants to state and national efforts to solve the toughest urban problems But the evidence suggests otherwise Cities are actively devising innovative policy solutions and they have the potential to do even more In this volume the authors examine current threats to communities across the U S and the globe They draw on first hand experience with and accounts of the crises already precipitated by climate change population shifts and economic inequality This volume is distinguished however by its central objective of traveling beyond a description of problems and a discussion of their serious implications Each of the thirteen chapters frame specific recommendations and guidance on the range of core capacities and interventions that 21st Century cities would be prudent to consider in mapping their immediate and future responses to these critical problems How Cities Will Save the World brings together authors with frontline experience in the fields of city redevelopment urban infrastructure healthcare planning immigration historic preservation and local government administration They not only offer their ground level view of threats caused by climate change population shifts and economic inequality but they provide solution driven narratives identifying promising innovations to help cities tackle this century's greatest adversities *The Wiley-Blackwell Encyclopedia of Urban and Regional Studies* Anthony M. Orum, 2019-04-15 Provides comprehensive coverage of major topics in urban and regional studies Under the guidance of Editor in Chief Anthony Orum this definitive reference work covers central and emergent topics in the field through an examination of urban and regional conditions and variation across the world It also provides authoritative entries on the main conceptual tools used by anthropologists sociologists geographers and political scientists in the study of cities and regions Among such concepts are those of place and space geographical regions the nature of power and politics in cities urban culture and many others The Wiley Blackwell Encyclopedia of Urban and Regional Studies captures the character of complex urban and regional dynamics across the globe including timely entries on Latin America Africa India and China At the same time it contains illuminating entries on some of the current concepts that seek to grasp the essence of the global world today such as those of Friedmann and Sassen on global cities It also includes discussions of recent economic writings on cities and regions such as those of Richard Florida Comprised of over 450 entries on the most important topics and from a range of theoretical perspectives Features authoritative entries on topics ranging from gender and the city to biographical profiles of figures like Frank Lloyd Wright Takes a global perspective with entries providing coverage of Latin America and Africa India and China and the US and Europe Includes biographies of central figures in urban and regional studies such as Doreen Massey Peter Hall Neil Smith and Henri Lefebvre The Wiley Blackwell Encyclopedia of Urban and Regional Studies is an indispensable reference for

students and researchers in urban and regional studies urban sociology urban geography and urban anthropology

Precarious Constructions Vanessa A. Rosa, 2023-11-06 This sharply argued book posits that urban revitalization making better city living spaces from those that have been neglected due to racist city planning and divestment is a code word for fraught state managed gentrification Vanessa A Rosa examines the revitalization of two Toronto public housing projects Regent Park and Lawrence Heights and uses this evidence to analyze the challenges of racial inequality and segregation at the heart of housing systems in many cities worldwide Instead of promoting safety and belonging Rosa argues that revitalization too often creates more intense exclusion But the story of these housing projects also reveals how residents pushed back on the ideals of revitalization touted by city officials and policymakers Rosa explores urban revitalization as a window to investigate broader questions about social regulation and the ways that racism classism and dynamics of inclusion exclusion are foundational to liberal democratic societies particularly as scholars continue to debate the politics of gentrification at the local level and the politics of integration and multiculturalism at the national level Urban Geography

in South Africa Ruth Massey, Ashley Gunter, 2019-08-17 This book embraces South Africa and its place in the Global South providing a succinct theoretical and empirical analysis and discussion of urban issues in the country There have been sporadic calls from the Urban Geography community for the development of an overarching and comprehensive text that explores contemporary processes and practices taking place in urban South Africa and more widely the Global South This is an edited collection of chapters by leading urban theorists and practitioners working on various themes within urban South Africa and serves as a base for scholars and students interested in urban perspectives from countries in the Global South

The Routledge Handbook of Urban Cultural Planning Rana Amirtahmasebi, Jason Schupbach, 2024-12-30 This book provides a manual for planning for arts and culture in cities featuring chapters and case studies from Africa the Americas Australasia the Middle East South and East Asia and more The handbook is organized around seven themes arts and planning for equity and social development incorporating culture in urban planning the intersection of creative and cultural industries and tourism planning financing public buildings public space and public art cultural heritage planning and culture and the climate crisis Urban planners are often tasked with preserving and attracting new art and culture to a city but there are no common rules on how practitioners accomplish this work This handbook will be an invaluable resource for city planners and designers cultural workers elected officials artists and social justice workers and advocates seeking to integrate creativity and culture into urban planning **Legacy Cities** J. Rosie Tighe, Stephanie Ryberg-Webster, 2019-06-13 Legacy

cities also commonly referred to as shrinking or post industrial cities are places that have experienced sustained population loss and economic contraction In the United States legacy cities are those that are largely within the Rust Belt that thrived during the first half of the 20th century In the second half of the century these cities declined in economic power and population leaving a legacy of housing stock warehouse districts and infrastructure that is ripe for revitalization This volume

explores not only the commonalities across legacy cities in terms of industrial heritage and population decline but also their differences. Legacy Cities poses the questions: What are the legacies of legacy cities? How do these legacies drive contemporary urban policy planning and decision making? And what are the prospects for the future of these cities? Contributors primarily focus on Cleveland, Ohio, but all Rust Belt cities are discussed. *The Routledge Handbook on Spaces of Urban Politics* Kevin Ward, Andrew E. G. Jonas, Byron Miller, David Wilson, 2018-04-17. The Routledge Handbook on Spaces of Urban Politics provides a comprehensive statement and reference point for urban politics. The scope of this handbook's coverage and contributions engages with and reflects upon the most important innovative and recent critical developments to the interdisciplinary field of urban politics, drawing upon a range of examples from within and across the Global North and Global South. This handbook is organized into nine interrelated sections with an introductory chapter setting out the rationale, aims, and structure of the Handbook and short introductory commentaries at the beginning of each part. It questions the eliding of urban politics into the politics of the city, reconsidering the usefulness of the distinction between old and new urban politics, considering issues of class, gender, race, and the ways in which they intersect, appear, and reappear in matters of urban politics; how best to theorize the roles of capital, the state, and other actors such as social movements in the production of the city; and finally, issues of doing urban political research. The various chapters explore the issues of urban politics of economic development, environment, and nature in the city; governance and planning; the politics of labour; as well as living spaces. The concluding sections of the Handbook examine the politics over alternative visions of cities of the future and provide concluding discussions and reflections, particularly on the futures for urban politics in an increasingly global and multidisciplinary context. With over forty-five contributions from leading international scholars in the field, this handbook provides critical reviews and appraisals of current conceptual and theoretical approaches and future developments in urban politics. It is a key reference to all researchers and policy makers with an interest in urban politics. *Global Planning Innovations for Urban Sustainability* Sébastien Darchen, Glen Searle, 2018-11-01. As the world becomes more urbanised, solutions are required to solve current challenges for three arenas of sustainability: social sustainability, environmental sustainability, and urban economic sustainability. This edited volume interrogates innovative solutions for sustainability in cities around the world. The book draws on a group of 12 international case studies, including Vancouver and Calgary in Canada; San Francisco and Los Angeles in the US; North America; Yogyakarta in Indonesia; Seoul in Korea; South East Asia; Medellin in Colombia; South America; Helsinki in Finland; Freiburg in Germany; and Seville in Spain, Europe. Each case study provides key facts about the city, presents the particular urban sustainability challenge, and the planning innovation process, and examines what trade-offs were made between social, environmental, and economic sustainability. Importantly, the book analyses to what extent these planning innovations can be translated from one context to another. This book will be essential reading to students, academics, and practitioners of urban planning, urban sustainability, urban geography, architecture, urban

design environmental sciences urban studies and politics **Entrepreneurship and the Industry Life Cycle** Serena Cubico, Giuseppe Favretto, João Leitão, Uwe Cantner, 2018-06-27 Adopting evolutionary and behavioral approaches this volume presents the latest research advances in knowledge competencies and human capital as well as the changing structural dynamics highlighting their links with entrepreneurial activities It provides a set of international benchmark case studies on initiatives at the national regional or individual level geared towards entrepreneurship development Focusing on diverse environments systems and life cycle stages young established and transition industries and markets as well as regions it offers a valuable guide for scholars and practitioners interested in the interaction of entrepreneurship knowledge competencies human resources management and innovation
