Urban Competitiveness Theory And Practice Regions And Cities

Peter K. Kresl

Urban Competitiveness Theory And Practice Regions And Cities:

Urban Competitiveness Peter Kresl, Daniele Ietri, 2014-08-27 During the past 25 years the burden of managing economic policy for competitiveness has devolved to cities and to urban regions National governments have increasingly been focused on staving off fiscal collapse Mayors and local administrations have become very creative and active in looking after the state of their local economy and have developed extensive agencies for inter city cooperation and action This book explores this evolving role of cities and urban regions Intelligent and rational policy must be based on an accurate understanding of the situation at hand and of the economic theory that can be utilized in the assessment of the most effective means that can be deployed This book examines the theoretical contributions of economists and geographers and through the analyses of the performance of various cities will give the reader an understanding of the logic behind rational policy formation Evaluation of a city s relative competitiveness is a controversial matter and this book provides a full treatment of the various approaches Finally it examines the experiences with competitiveness of several cities in North America and in Europe Urban Competitiveness Theory and Practice confirms that many cities in trying times do have a mechanism for enhancing their competitiveness and can work to create the sort of economic life the city s residents want Towards a

Competitive, Sustainable Modern City Peter K. Kresl, 2020-11-27 This original book examines the experiences cities and urban areas have had with two principal concerns that confront them today sustainability and competitiveness Featuring a wide ranging set of contributions from top researchers this book discusses and analyzes the issues that different cities face such as social cohesion tolerance and cultural diversity and how this will determine their developmental trajectories through the coming decade Towards a Competitive Sustainable Modern City will be an invaluable read for scholars and professors in urban economics and urban studies more broadly particularly those who are focusing on the importance of sustainability in both areas

Code and the City Rob Kitchin, Sung-Yueh Perng, 2016-04-20 Software has become essential to the functioning of cities It is deeply embedded into the systems and infrastructure of the built environment and is entrenched in the management and governance of urban societies Software enabled technologies and services enhance the ways in which we understand and plan cities It even has an effect on how we manage urban services and utilities Code and the City explores the extent and depth of the ways in which software mediates how people work consume communication travel and play The reach of these systems is set to become even more pervasive through efforts to create smart cities cities that employ ICTs to underpin and drive their economy and governance Yet despite the roll out of software enabled systems across all aspects of city life the relationship between code and the city has barely been explored from a critical social science perspective This collection of essays seeks to fill that gap and offers an interdisciplinary examination of the relationship between software and contemporary urbanism This book will be of interest to those researching or studying smart cities and urban infrastructure

Territorial Policy and Governance Iain Deas, Stephen Hincks, 2017-02-24 In response to both policy

and conceptual debates alternative narratives have begun to emerge about territorial governance and policymaking As local and regional policy actors strive to respond to the geographically uneven effects of the economic crises of the early twenty first century a crucial question emerges what are the opportunities and challenges presented by alternative forms of territorially based governance and policy The aim of this edited volume therefore is critically to explore the opportunities and challenges presented by different forms of territorial policy and governance Drawing on conceptual debates and empirical research from the United Kingdom and other international contexts the contributors engage with issues around the politics and governance of territorial development economic development planning and regeneration and the environment Territorial Policy and Governance addresses the question of how alternative forms of territorial governance and policy can help to shape patterns of urban and regional development highlighting the related opportunities constraints and challenges that confront their operationalisation This book will be essential reading for international audiences with an interest in territorial development governance politics human geography and planning and regeneration

Transitions in Regional Economic Development Ivan Turok,David Bailey,Jennifer Clark,Jun Du,Ugo Fratesi,Michael Fritsch,John Harrison,Tom Kemeny,Dieter Kogler,Arnoud Lagendijk,Tomasz Mickiewicz,Ernest Miguelez,Stefano Usai,Fiona Wishlade,2018-10-18 At a time of extraordinary challenges confronting the world this book analyses some of the profound changes occurring in the development of cities and regions It discusses the uncertainties associated with the stalling of hyper globalization and asks whether this creates opportunities for resurgent regional economies driven by local capabilities resource efficiencies and domestic production Theory and evidence on socio economic and environmental transitions underway in many regions are brought together Implications of the shifting balance of global power towards emerging economies in the East are explored along with the consequences of urbanization in the global South for politics and democracy Dilemmas surrounding migration are also discussed including whether incomers displace local workers and depress wages or bring benefits in the form of know how new technology and investment More integrative concepts of the region and theories of regional development are analysed recognising the role of human capital knowledge innovation finance infrastructure and institutions This was originally published as a special issue of Regional Studies

Governing Smart Specialisation Dimitrios Kyriakou,Manuel Palazuelos Martínez,Inmaculada Periañez-Forte,Alessandro Rainoldi,2016-10-04 In recent years smart specialisation has been a key building block of regional economic and development policy across the European Union Providing targeted support for innovation and research it has helped identify those areas of greatest strategic potential developing mechanisms to involve the fullest range of stakeholders before setting strategic priorities and using the policy to maximize the knowledge based potential of a region or territory Governing Smart Specialisation contributes to the emerging debate about the role of the entrepreneurial discovery process EDP which is at the heart of smart specialisation strategies for regional economic transformation Particular focus is placed on what methods procedures and institutional conditions are necessary in order to

generate information that helps buttress policy decisions It draws on existing literature that analyses the relevance of EDP within smart specialisation for regional policy Chapters are complemented with case studies about regions with different geographical and socioeconomic characteristics in Europe from Norwegian regions to the Greek region of East Macedonia and Thrace As one of the first books to directly address the EDP this is essential reading for students interested in regional economics public policy urban studies and technology innovation as well as for policy makers in regional and national administrations

Urban Competitiveness in Developing Economies Peter Karl Kresl, 2020-06-08 Plenty has been written on the competitiveness of megacities capital cities and regional hubs Cities in developing countries have not yet received the same attention this book fills that gap An international team of expert academics have come together to present a comprehensive study of the competitiveness of cities in the developing world Spanning Asia Africa and Latin America this book homes in on specific city cases and examines how they relate to the rest of the global economy The focus is on acknowledging their unique contexts while drawing out commonalities and ultimately identifying ways for them to enhance their competitiveness wellbeing and sustainability This volume will be valuable reading to advanced students researchers and policymakers in urban and regional studies economic geography and economic development

Leadership and the City Markku Sotarauta, 2015-11-06 The 21st century has been dominated by an almost compulsive race to find new pathways for city development As cities seek to regenerate via the knowledge based economy now more than ever dynamic leadership is required order to navigate new and complex challenges while building community This book is about generative leadership in knowledge city development Leadership and the City is rooted in a conviction that the leadership in a city is crucial in order for it to adjust strategically to major transformations and thus secure a good future for its inhabitants The book opens a fresh view of leadership by focusing on generative leaders and their modes of leading instead of spatial categorisations governance structures and or policy contents and processes It investigates generative leadership by elaborating the modes of leadership power and strategies in influence networks The key points are highlighted with several empirical cases These include Akron and Rochester USA Munich Germany Leeds UK Barcelona Spain as well as Helsinki Tampere and Seinäjoki Finland This book will be of interest to researchers and practitioners concerned with Leadership Urban Studies and Strategic Management

City Competitiveness and Improving Urban Subsystems: Technologies and Applications Bulu, Melih, 2011-10-31 Cities are becoming the wealth producing centers of national economies Increasing the operational efficiency of the city will bring a competitive edge to the whole system Yet many city subsystems cannot work together creating significant problems and inefficiencies City Competitiveness and Improving Urban Subsystems Technologies and Applications uses information science perspectives to improve working subsystems in transportation sewage electricity water communication education health governance and infrastructure since their efficient and synchronized operation is vital for a competitive city This pioneering approach will interest researchers professionals and policymakers in urban economy regional planning and information

science disciplines who wish to improve the competitiveness of their cities
