Textbook of Female Urology and Urogynecology, Fourth Edition - Two-Volume Set Linda Cardozo, David Staskin, 2017-01-06. Featuring contributions by an international team of the world's experts in urology and gynecology, this fourth edition reinforces its status as the classic comprehensive resource on female urology and urogynecology and an essential clinical reference in the field. **Gynecologic and Obstetric Surgery** Arri Coomarasamy, Mahmood Shafi, G. Willy Davila, K. K. Chan, 2016-04-04. Gynecologic and obstetric surgery is a craft that requires sound knowledge and skills. The specifics of each individual case must be understood to enable the best surgical management approach and to minimize complications. This resource book offers insightful management options to many of the challenges a gynecologic or obstetric surgeon may face before, during, and after an operation. Divided into two sections, the book first covers general preoperative, intraoperative, and postoperative challenges, and second, specific surgical procedures. It provides advice on both general gynecologic and obstetric operations as well as subspecialist areas such as reproductive surgery, urogynecology, and gynecologic oncology. The chapters are concise, beginning with illustrative case histories followed by background, management options, and any preventative approaches. Designed to guide the surgeon to safe practice throughout all stages, they offer practical and step-by-step help. **Overactive Bladder** Jacques Corcos, Scott MacDiarmid, John Heesakkers, 2015-06-15. *Overactive Bladder: Practical Management* provides urologists, gynecologists, and other health practitioners with a comprehensive clinical guide to this very common problem, resulting in a perfect resource to consult, time and time again. Beginning with an introductory section covering the definition and pathophysiology of OAB, it then moves on to cover evaluation, first-line management, second-line management, and finally surgery. Well illustrated throughout, each chapter begins with a key points box outlining the most important take-home messages. Also included are clear management algorithms to aid decision making, Do's and Don't boxes to help avoid errors, key references to the top journal articles, and the very latest guidelines from the EAU, AUA, and other major urology societies. Chapters are written by the top names in the field, and the entire book is expertly edited by Jacques Corcos, John Heesakkers, and Scott MacDiarmid. The result is a consistent, comprehensive, and fully up-to-date approach to OAB, providing urologists managing patients with this condition with rapid access to specialist clinical guidance. web 1 2 i the complex number system $\mathbb{R}$ is a field for $n \geq 1$ $\mathbb{R}^n$ is a vectorspace over $\mathbb{R}$ so is an additive group but doesn't have a multiplication on it we can endow $\mathbb{R}^2$ with a multiplication by $(a, b)(c, d) = (ac - bd, bc + ad)$ under this definition $\mathbb{R}^2$ becomes a field denoted $\mathbb{C}$ note that $(a, b)^{-1} = (a^2 + b^2)^{-1}(a, b)$ is the multiplicative inverse of (a, b)
