US Destroyers 1942-45 Wartime Classes New Vanguard:

US Destroyers 1942-45 Dave McComb, 2011-12-20 Few if any 20th century warships were more justly acclaimed than the destroyers of the US Navy's Fletcher class. Admired as they were for their advanced and rakish design, it was their record as workhorses of the Pacific War that placed them among the most battle-tested and successful fighting ships of all time. This title describes the Fletchers and their Allen M. Sumner and Gearing class derivatives, their machinery, armament, and construction, with a listing of all 343 ships by hull number and builder. It features an operational history of the 287 ships commissioned during World War II, which traces the evolution of night surface action tactics in the Solomon Islands and the parallel development of the Combat Information Center, the drive across the Pacific, and liberation of the Philippines, with tables showing the rapid introduction of new squadrons and the radar pickets' climactic stand against kamikaze aircraft at Okinawa. With summaries of losses and decorations and specially commissioned artwork, this is a definitive book on the wartime US destroyer classes.

US Navy Aircraft Carriers 1942-45 Mark Stille, 2012-05-20 Aircraft carriers were the US Navy's principal weapon against Japan during the Pacific War. Development of the Essex class began in 1939, becoming the largest class of carrier ever to be built. Early in the Pacific War, it became renowned for its 'Sunday Punch' of 36 fighter planes, 36 dive bombers, and 18 torpedo planes. Alongside the lighter Independence class, these carriers formed the formidable Fast Carrier Force in the Pacific. Featuring artwork detailing the interior and exterior features of the ships, this book explores their design, development, and the action they saw in the Pacific, including the climactic battles of Philippine Sea, Leyte Gulf, and Okinawa.

Kriegsmarine U-boats 1939-45 (2) Gordon Williamson, 2012-04-20 This title follows from New Vanguard 51, *Kriegsmarine U-boats 1939-45 1*, and charts the continuing development of the U-boat in German service, including the evolution of the Type IX as a long-range cruiser intended for solo operations in distant waters. Also covered is the revolutionary Type XXI, conceived in 1942 and launched in April 1944, the first true submarine rather than submersible, whose arrival was just too late to influence the war. Other vessels covered are the Type XXIII, a small vessel armed with only two torpedoes but technically highly advanced, and the Type X minelayers, which were rarely used in their intended role and more often used as supply boats.

US Submarines 1941-45 Jim Christley, 2012-02-20 Naval warfare in the Pacific changed completely with the Japanese attack on Pearl Harbor in 1941. The strategic emphasis shifted from battleships to much more lethal, far-ranging weapons systems; one of these was the submarine. This book details the design and development, classes, weapons, and equipment, tactics, and operational history of the US submarine in World War II. Detailed tables, photographs, and superb color plates depict the force that had an effect far beyond its size: the submarine accounted for 55% of all Japanese shipping losses despite suffering the highest percentage loss of any unit of the United States Armed Forces in World War II.

British Artillery 1914-19 Dale Clarke, 2012-05-20 World War I is often deemed to have been a war of artillery, and British heavy artillery played a vital part in destroying the German trenches and providing invaluable cover for advancing

troops on the Western Front This book details the huge guns of the Royal Garrison Artillery including the 6 in siege gun and howitzer the 8 in howitzer the 12 in railway and siege howitzer and the infamous 9 2 in breech loading siege howitzer Camouflage and enemy battery locations and transport are covered as well as tactics used and how the guns were developed and manned **German Pocket Battleships 1939-45** Gordon Williamson,2012-04-20 After the end of World War I the German Navy came up with the concept of the Panzerschiffe or Pocket Battleship as a method of circumventing treaty limitations on the size and types of ship Germany was permitted to build New more modern production methods where welded construction prevailed over the older riveting process were combined with the development of modern engines capable of fast speeds and a very powerful armament far superior to that on any enemy Cruisers This book covers these three sister ships the Deutschland the Admiral Graf Spee and the Admiral Scheer which formed the core of the Kriegsmarine s fighting power at the start of World War II **American Light and Medium Frigates 1794-1836** Mark

Lardas,2012-01-20 The Original Six frigates were commissioned by the new born US Navy at a staggering cost of nearly 700 000 Designed to be light and fast these warships enabled America to project its power across the globe Among the ships Mark Lardas examines is USS Constellation the first ship to be commissioned by the United States Navy Alongside stirring accounts of engagements during the Barbary Wars the author explores the design and development of these frigates explaining the shortcomings that led to their replacement by larger heavier 44 gun models by 1800 Packed with contemporary illustrations of US frigates and their British and French rivals this book follows the escalation of the naval arms race during the 18th century **German Destroyers 1939-45** Gordon Williamson,2012-04-20 The German destroyer fleet of World War II consisted of nine classes the Diether Von Roeder Class the Leberecht Maas Class and the wartime classes Z23 Z35 Z37 Z40 Z43 Z46 and Z52 These vessels though fewer in number than the British destroyer fleet tended to be much bigger and more powerful than their allied counterparts They served their country well in operations in the Channel North Sea the Far North and in the rescue of civilians from East Prussia during the final days of the war This title describes their design development and operational use from the fjords of Narvik to the final days of the war **British Heavy Cruisers 1939-45** Angus Konstam,2012-05-20 The idea of a heavy cruiser emerged in the aftermath of World War I and was closely linked to the limits set by the inter war Washington Naval Treaty The pre World War I concept of armoured cruisers had been abandoned but in their stead the Admiralty saw a place for powerful cruisers able to patrol the sea lanes of the British Empire and which were well armed enough that they could destroy enemy commerce cruisers The result was a group of British warships known as the Washington Treaty Cruisers that did everything the Admiralty wanted but which conformed to the limits imposed by the treaty These impressive cruisers were high sided spacious and stately perfect peacetime ambassadors for British power In war they also packed a considerable punch During World War II the Royal Navy s thirteen heavy cruisers saw service in every theatre of the war whether facing the Bismarck in the North Atlantic or enduring

kamikaze attacks in the Pacific *German Battleships 1914-18 (2)* Gary Staff, 2012-01-20 Supported by official documents personal accounts official drawings and specially commissioned artwork this volume is an informative history of the key classes Kaiser K nig and Bayern that formed the backbone of the German Imperial Navy throughout World War I detailing the technological revolution that had taken place to enable the building of these large dreadnought classes
