Treating Dissociative Identity Disorder The Power Of The Collective Heart:

Treating Dissociative Identity Disorder Sarah Y. Krakauer, 2001 First Published in 2001 Routledge is an imprint of Taylor Francis an informa company **Treating Trauma-Related Dissociation** Kathy Steele, Suzette Boon, Onno van der Hart, 2016-11-29 Winner of the 2017 International Society for the Study of Trauma and Dissociation ISSTD Pierre Janet Writing Award Establishing safety and working with dissociative parts in complex trauma therapy Therapists around the world ask similar questions and struggle with similar challenges treating highly dissociative patients This book arose not only out of countless hours of treating patients with dissociative disorders but also out of the crucible of supervision and consultation where therapists bring their most urgent questions needs and vulnerabilities The book offers an overview of the neuropsychology of dissociation as a disorder of non realization as well as chapters on assessment prognosis case formulation treatment planning and treatment phases and goals based on best practices The authors describe what to focus on first in a complex therapy and how to do it how to help patients establish both internal and external safety without rescuing how to work systematically with dissociative parts of a patient in ways that facilitate integration rather than further dissociation how to set and maintain helpful boundaries specific ways to stay focused on process instead of content how to deal compassionately and effectively with disorganized attachment and dependency on the therapist how to help patients integrate traumatic memories what to do when the patient is enraged chronically ashamed avoidant or unable to trust the therapist and how to compassionately understand and work with resistances as a co creation of both patient and therapist Relational ways of being with the patient are the backbone of treatment and are themselves essential therapeutic interventions As such the book also focused not only on highly practical and theoretically sound interventions not only on what to do and say but places strong emphasis on how to be with patients describing innovative compassionately collaborative approaches based on the latest research on attachment and evolutionary psychology Throughout the book core concepts fundamental ideas that are highlighted in the text in bold so they can be seen at a glance are emphasized These serve as guiding principles in treatment as well as a summing up of many of the most important notions in each chapter Each chapter concludes with a section for further examination These sections include additional ideas and questions exercises for practicing skills and suggestions for peer discussions based on topics in a particular chapter meant to inspire further curiosity discovery and growth **Coping with Trauma-Related Dissociation** Suzette Boon, Kathy Steele, Onno van der Hart, 2011-03-28 Winner of the 2011 International Society for the Study of Trauma and Dissociation ISSTD Pierre Janet Writing Award A patient oriented manual for complex trauma survivors This training manual for patients who have a trauma related dissociative disorder includes short educational pieces homework sheets and exercises that address ways in which dissociation interferes with essential emotional and life skills and support inner communication and collaboration with dissociative parts of the personality Topics include understanding dissociation and PTSD using inner reflection emotion

regulation coping with dissociative problems related to triggers and traumatic memories resolving sleep problems related to dissociation coping with relational difficulties and help with many other difficulties with daily life The manual can be used in individual therapy or structured groups

The Haunted Self Onno van der Hart, Ellert R. S. Nijenhuis, Kathy Steele, 2014-09-02 Life is an ongoing struggle for patients who have been chronically traumatized They typically have a wide array of symptoms often classified under different combinations of comorbidity which can make assessment and treatment complicated and confusing for the therapist Many patients have substantial problems with daily living and relationships including serious intrapsychic conflicts and maladaptive coping strategies Their suffering essentially relates to a terrifying and painful past that haunts them Even when survivors attempt to hide their distress beneath a facade of normality a common strategy therapists often feel besieged by their many symptoms and serious pain Small wonder that many survivors of chronic traumatization have seen several therapists with little if any gains and that quite a few have been labeled as untreatable or resistant In this book three leading researchers and clinicians share what they have learned from treating and studying chronically traumatized individuals across more than 65 years of collective experience Based on the theory of structural dissociation of the personality in combination with a Janetian psychology of action the authors have developed a model of phase oriented treatment that focuses on the identification and treatment of structural dissociation and related maladaptive mental and behavioral actions The foundation of this approach is to support patients in learning more effective mental and behavioral actions that will enable them to become more adaptive in life and to resolve their structural dissociation This principle implies an overall therapeutic goal of raising the integrative capacity in order to cope with the demands of daily life and deal with the haunting remnants of the past with the unfinished business of traumatic memories Of interest to clinicians students of clinical psychology and psychiatry as well as to researchers all those interested in adult survivors of chronic child abuse and neglect will find helpful insights and tools that may make the treatment more effective and efficient and more tolerable for the suffering patient

Essentials of Clinical Hypnosis Steven J. Lynn, Irving Kirsch, 2006 This book is essentially clinical in nature But it is a clinical book with a research base The clinical strategies and techniques that are presented are ones that the authors have used in their practice and that they have taught their graduate students to use They are procedures with an evidential base Many of the specific techniques they describe have been validated in clinical trials and outcome studies and their approach to most strategic issues has been shaped by their understanding of the research literature in hypnosis psychotherapy and psychopathology If there is a fundamental difference between this book and the many other guides that have been published on clinical applications of hypnosis it is the degree to which the principles and practices the authors describe are evidencebased Hence the subtitle of this book The authors aim to bring their enthusiasm for integrating hypnosis with empirically supported methods to a wide readership and to move hypnosis more securely into the mainstream of established clinical practice PsycINFO Database Record c 2006 APA all rights reserved Internationale Bibliographie der Rezensionen wissenschaftlicher Literatur ,2003 **The British National Bibliography** Arthur James Wells, 2002

Dissociative Identity Disorder Colin A. Ross, 1997 By providing an in depth examination of this complex illness Dissociative Identity Disorder not only facilitates a deeper understanding of people who have used dissociation to cope with years of childhood physical sexual and emotional abuse but also reveals new insights into many other psychiatric disorders in which dissociation plays a role Like Multiple Personality Disorder this updated volume is an authoritative and indispensable reference for psychiatrists clinical psychologists psychiatric nurses social workers and other mental health professionals as well as researchers in these fields **Mental and Physical Disability Law Reporter** ,2000

Understanding and Treating Dissociative Identity Disorder Elizabeth F. Howell, 2011-06 Building on the comprehensive theoretical model of dissociation elegantly developed in *The Dissociative Mind* Elizabeth Howell makes another invaluable contribution to the clinical understanding of dissociative states with *Understanding and Treating Dissociative Identity Disorder* Howell working within the realm of relational psychoanalysis explicates a multifaceted approach to the treatment of this fascinating yet often misunderstood condition which involves the partitioning of the

personality into part selves that remain unaware of one another usually the result of severely traumatic experiences Howell begins with an explication of dissociation theory and research that includes the dynamic unconscious trauma theory attachment and neuroscience She then discusses the identification and diagnosis of Dissociative Identity Disorder DID before moving on to outline a phase oriented treatment plan which includes facilitating a multileveled co constructed therapeutic relationship emphasizing the multiplicity of transferences countertransferences and kinds of potential enactments She then expands the treatment possibilities to include dreamwork before moving on to discuss the risks involved in the treatment of DID and how to mitigate them All concepts and technical approaches are permeated with rich clinical examples
