Performance Task

Sohcahtoa Mountain

The Sohcahtoa Mountain Ski Resort is a popular ski club, especially with snow boarders. Last weekend though, the resort had to shut down for three days because of a major blizzard. When the ski patrol went to check the runs after the blizzard, they couldn't find the rating signs that tell how difficult the runs are. They returned back to the base lodge to check the map on the computer. Unfortunately, the blizzard caused a power outage and the computer that had the files listing the steepness of each run were lost. All the ski patrol could find was a scale drawing of the mountain that outlines the runs and chairlifts and shows where the chalets and base lodge are. The length of the runs are also on the map. Each centimetre represents 100m. Howie Trig, the head of the ski patrol was not worried. He said they had all the information they needed to find the steepness of each run (this would be the angle of elevation) using their trigonometry skills. The table shows the three ratings for the runs.
