Artificial Intelligence Research and Development Sandra Sandri, Miquel Sànchez-Marrè, Ulises Cortés, 2009 This book is a collection of 45 accepted papers originally submitted for the 12th International Conference of the Catalan Association for Artificial Intelligence ACIA It also includes a brief summary of two papers from invited speakers The Catalan Association for Artificial Intelligence was founded in 1994 with the aim of fostering cooperation among researchers from the Catalan speaking AI research community Collaboration between ACIA members and the wider international AI community has also been well established now for many years The papers in these proceedings reflect this collaboration and include contributions not only from the Catalan speaking regions of Spain but also from France and Italy and from as far afield as Mexico and Australia Of all the fields in computer science AI is the one most intertwined with all sorts of disciplines dealt with in the human experience often employing lessons learnt in one discipline to implement a task in another The papers in this volume reflect the rich diversity in AI covering areas such as logics natural language machine learning computer vision robotics and multi agent systems

The Berkana Community of Conversations Marilyn Hamilton, 2006-05-26 This research used the online experiment the Berkana Community of Conversations BCC as a case study to explore learning and leadership in a self organizing online microworld an internet small world with rules of engagement simulating complex adaptive organizations Based on theories of learning Papert 1996 biology of consciousness Maturana and Varela 1992 and integral models Wilber 1996 an integral methodological design analyzed languaging and relationships as key data sources Leadership was mapped as a continuum of behaviors that created effective processes for meaning making action direction and accomplishment Meaning making was tracked in four directions three types of connections exploratory transformative and linking and six plus levels Self organizing leaders 1 initiated patterns 2 developed patterns and 3 created connections The same mapping

revealed the ontogeny of community learning within organization s System wide order emerged through learning tracked on four quadrant developmental scales intentional behavioral cultural and social Wilber 1996 The microworld demonstrated connections create meanings patterns create relationships create identity As a self organizing microworld BCC survived seven months structurally coupled with its environment and replicated itself within and outside experiment boundaries Such a microworld can realistically replicate action based learning situations where leaders learn new ways of leading and organizing

Stigmergic Optimization Ajith Abraham,Crina Grosan,Vitorino Ramos,2006-10-06 Biologists studied the behavior of social insects for a long time After millions of years of evolution all these species have developed incredible solutions for a wide range of problems The intelligent solutions to problems naturally emerge from the self organization and indirect communication of these individuals Indirect interactions occur between two individuals when one of them modifies the environment and the other responds to the new environment at a later time Such an interaction is an example of stigmergy This book deals with the application of stigmergy for a variety of optimization problems This volume comprises 12 chapters including an introductory chapter giving the fundamental definitions inspirations and some research challenges Important features include a detailed overview of all the stigmergic optimization paradigms excellent coverage of timely advanced stigmergic optimization topics state of the art theoretical research and application developments and chapters authored by pioneers in the field Academics scientists as well as engineers engaged in research development and application of stigmergic optimization will find the comprehensive coverage of this book invaluable
