**Women Artists, Feminism and the Moving Image** Lucy Reynolds, 2019-08-22 What is the significance of gendered identification in relation to artists moving image How do women artists grapple with the interlinked narratives of gender discrimination and gender identity in their work In this groundbreaking book a diverse range of leading scholars activists archivists and artists explore the histories practices and concerns of women making film and video across the world from the pioneering German animator Lotte Reiniger to the influential African American filmmaker Julie Dash and the provocative Scottish contemporary artist Rachel Maclean Opening with a foreword from the film theorist Laura Mulvey and a poem by the artist film maker Lis Rhodes *Women Artists Feminism and the Moving Image* traces the legacies of early feminist interventions into the moving image and the ways in which these have been re configured in the very different context of today Reflecting and building upon the practices of recuperation that continue to play a vital role in feminist art practice and scholarship essays discuss topics such as how multiculturalism is linked to experimental and activist film history the function and nature of the essay film feminist curatorial practices and much more This book transports the reader across diverse cultural contexts and geographical contours addressing complex narratives of subjectivity representation and labour while juxtaposing cultures of film video and visual arts practice often held apart As the editor Lucy Reynolds argues it is at the point where art moving image and feminist discourse converge that a rich and dynamic intersection of dialogue and exchange opens up bringing to attention practices which might fall outside their separate spheres and offering fresh perspectives and insights on those already established in its histories and canons *Counterpractice* Rakhee Balaram, 2022-03-08 *Counterpractice* highlights a generation of women who used art to define a culture of experimental thought and practice during the period of the French women s movement or Mouvement de Lib ration des Femmes 1970 81 It considers women s art in relation to some of the most exciting thinkers to have emerged from the French literature and philosophy of the 1970s H l ne Cixous Luce Irigaray and Julia Kristeva forcing a timely reconsideration of the full spectrum of revolutionary practices by women in the years following the events of May 68 Lavishly illustrated with over 200 images the book also features an illuminating foreword by art historian Griselda Pollock *Revisiting the Gaze* Morna Laing, Jacki Willson, 2020-07-23 In 1975 Laura Mulvey published her seminal essay on the male gaze ushering in a new era in understanding the politics and theory of looking at the female body Since then feminist thinking has expanded upon and revised Mulvey s theory and much of the Western world has seen a resurgence in feminist activism as well as the rise of neoliberalism and shifts in digital culture and self representation For the first time this book addresses what it means to look at the fashioned female body in this radical new landscape In chapters exploring the fashioned body within contexts such as queerness veiling blackness pregnancy fatness and criminality *Revisiting the Gaze* addresses intersectional debates in feminism and re evaluates the concept of the gaze in light of recent social and political changes With an interdisciplinary

Sculptural Photographs Patrizia di Bello, 2018-05-03 This is the first monograph exploring how throughout its history sculpture has provided a model to conceptualize photography as an art of mechanical reproduction While there is a growing body of work examining how photography has contributed to the development of a Western sculptural imagination by disseminating works facilitating the investigation of the medium or changing sculptural aesthetics this study focuses on how sculpture has provided not only beautiful and convenient subject matter for photographs or commercial and cultural opportunities for photographers in the market for art reproductions but also an exemplar for thinking about photography as a medium based on mechanical means of production In both media processes from conception to realization involve apparatus that bypass the touch of the artist so important to enduring notions of the value of works of art The book closely analyses a number of case studies from 1847 to

the present selected both to explicate the conceptual and technological continuities between the two media and also because of how they illuminate the materiality of photographic objects The final chapter considers the convergence of the two media in contemporary sculptural practices that use forms of 3D photography and computer operated sculpting machines Rooted in an understanding of the practical social and aesthetic implications of photographic as well as sculptural technologies this volume demonstrates how photographs of sculpture are particularly useful in revealing how photography s changing materialities shape the meaning of images as they are made circulated looked at written about and handled at different historical moments
