Mitchell, 2021-09-15 This book goes beyond other police leadership books to teach practitioners how to think about policing in a structured way that synthesizes criminological theory statistics research design applied research and what works and what doesn't in policing into Mental Models A Mental Model is a representation of how something works Using a Mental Model framework to simplify complex concepts readers will take away an in depth understanding of how cognitive biases affect our ability to understand and interpret data what empirical research says about effective police interventions how statistical data should be structured for management meetings and how to evaluate interventions for efficiency and effectiveness While evidence based practice is critical to advancing the police profession it is limited in scope and is only part of what is necessary to support sustainable change in policing Policing requires a scientifically based framework to understand and interpret data in a way that minimizes cognitive bias to allow for better responses to complex problems Data and research have advanced so rapidly in the last several decades that it is difficult for even the most ambitious of police leaders to keep pace The Twenty one Mental Models were synthesized to create a framework for any police public or community leader to better understand how cognitive bias contributes to misunderstanding data and gives the reader the tools to overcome those biases to better serve their communities The book is intended for a wide range of audiences including law enforcement and community leaders scholars and policy experts who specialize in policing students of criminal justice organizations and management reporters and journalists individuals who aspire to police careers and citizen consumers of information about policing Anyone who is going to make decisions about their communities based on data has a responsibility to be numerate and this book *Twenty one Mental Models That Can Change Policing A Framework For Using Data and Research For Overcoming Cognitive Bias* will help you become just that

now largely Uganda and in these newly unearthed short stories we again find him in familiar terrain and with his faithful retinue of trackers and camp followers We also find Bell in unfamiliar terrain Travel with Bell to the French Congo where he encounters a man eating leopard and go along with him to West Africa when he ventures into the rain forest with the Pygmies to test his luck against elephants in dense vegetation Then there are some wonderfully descriptive stories of an elephant camp and its social life crocodiles that menace a village several hunts for elephants on islands in the Ubangi River not for the faint of heart and a trip from Kano to Khartoum via motor car
