Each chapter offers a unique perspective on the transformative power of lifelong learning and collective commitment. Contributors share their insights from grassroots to high-level policy discussions, shedding light on the challenges and triumphs encountered along the way. This is the first major book looking at learning cities across the globe from both theoretical and practical perspectives. What sets it apart is the diversity in the material offered and the geographical and cultural spread of contexts. Cities are becoming ever more important to the future of humanity; learning cities are a vast laboratory of new and innovative ways in which people can learn together to create more fulfilling lives, better opportunities, and put into practice on a daily basis the four principles outlined in the Delors Report 1996: Learning to know, Learning to do, Learning to live together, Learning to be. This book is a valuable resource for policymakers, educators, and community leaders striving to build more inclusive and sustainable societies. Whether embarking on the journey of developing a learning city or seeking inspiration from successful initiatives, readers will find practical insights and thought-provoking perspectives within these pages.

[Africa and the Sustainable Development Goals](#) Maano Ramutsindela, David Mickler, 2019-06-13. The book draws upon the expertise and international research collaborations forged by the Worldwide Universities Network Global Africa Group to critically engage with the intersection in theory and practice of the Sustainable Development Goals (SDGs) and Africa's development agendas and needs. Further, it argues that and demonstrates how the SDGs should be understood as an aspirational blueprint for development with multiple meanings that are situated in dynamic and contested terrains. As the SDGs have substantial implications for development policy and resourcing at both the macro and micro levels, their relevance is not only context-specific but should also be assessed in terms of the aspirations and needs of ordinary citizens across the continent. Drawing on analyses and evidence from both the natural and social sciences, the book demonstrates that progress towards the SDGs must meet demands for improving human well-being under diverse and challenging socio-economic, political, and environmental conditions. Examples include those from the mining industry, public health, employment, and the media. In closing, it highlights how international collaboration in the form of research networks can enhance the production of critical knowledge on and engagement with the SDGs in Africa.
