University Of Limpopo Application Forms 2015:

Corrupted Jonathan D Jansen, 2023-02 Through investigatory reports and interviews Jonathan Jansen reveals the structural conditions for chronic dysfunction in a sample of South African universities. He reveals the political economy at work and the intense competition for resources on campuses. He also provides interventions for these fragile institutions. Why do some universities seem to be in a constant state of turmoil and dysfunction? Jonathan Jansen explores the root causes of chronic instability in a sample of South African universities. Through scrutiny of investigatory reports and interviews with more than 100 university managers and government officials, Jansen finds that at the heart of the dysfunction in universities is an intense and sometimes deadly competition for resources, especially on campuses located in impoverished communities. It is not the lack of institutional resources but their concentration in a university that draws a mix of corrupt actors from local politicians and taxi operators to members of council and management into a never-ending run on the material, such as money for infrastructure and symbolic, namely graduation certificates for sale. Assets of these institutions, Jansen argues, that the problem won't be solved through investments in capacity building alone because the combination of institutional capacity and institutional integrity contributes to serial instability in universities. Jansen makes an important intervention to understanding the root causes and offers interventions to produce stabilities, such as the depoliticisation of university councils and appointing academics of integrity and capacity in the management and leadership of these fragile institutions. This groundbreaking and long overdue study will offer a promising way forward for universities to better serve their communities and the country more broadly. *Practices and Perspectives of Teaching and Teacher Education in Africa* Boadu, Gideon, Odhiambo, George, Marandi, Pegah, 2023-09-25 Teacher education is a known variable that impacts the quality of teaching and schooling. Yet while research on practices in teaching and teacher education abound in other contexts, there seems to be no comprehensive reference work on teaching and teacher education in Africa. With Africa and the diaspora boasting rich, diverse political and educational contexts and practices, this gap in knowledge requires that attention be focused on investigating issues that shape the pace, course, and direction of teaching and teacher education in these contexts. *Practices and Perspectives of Teaching and Teacher Education in Africa* facilitates scholarly discussions among scholars and practitioners about practices, innovations, and future possibilities for educating the next generation of competent students and teachers in Africa. Covering topics such as educational reforms, equity, career progression, and curriculum development, this major reference work is ideal for administrators, industry professionals, researchers, academicians, scholars, practitioners, instructors, and students. Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy Joy E. Akahome, Michael Twum-Darko, Cyril Ogbokor, Nyaniso Mfusi Zonke, T. Sethibe, R. Steyn, Esme Mohammed, Renier Steyn, L.B. Nguenang, Mamorena Lucia Matsoso, Henry N. Ozuru, Julius Akaba, Patient Rambe, Edem Korku Agbobli, Henri-Vincent Ndjave-Ndjoy, Regis Muchemwa, Andre de la Harpe, Konosoang Mpiti, Ayodeji Afolayan, 2016-12-31 Cape Town South Africa 7 Sept 2016 8 Sept 2016 Theme Sustainable economies in the information economy Purpose To share the quality academic papers presented at the International Conference on Business and Management Dynamics ICBMD held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town As grey literature the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates Methodology The methodology used varies from researcher to researcher but are suitable for the studies conducted Thus on the one hand studies that were subjective in nature used the interpretive paradigm where the qualitative approach adopted made use of the interview method to collect data On the other hand studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data However there were some academic papers which used mixed methodology because of the

nature of the study Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology
Contribution made to scholarship The articles come from individual researchers and each article in the proceedings is unique
Mostly there is no general argument leading from one contribution to the next However it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth With regard to human capital development papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic Thus the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors Furthermore it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful and as such new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation With regard to technology and big data impact on organisational performance it was evident that system performance memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance Most of the articles contribution reemphasised technology education and training as a means of digitising business and improving effectiveness
Target audience The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics information management business education development studies social sciences and technology It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment [Encyclopedia of Stateless Nations](#)
