Diversity, Equity, and Inclusion in Astronomy Jörg Matthias Determann, 2023-11-14 Astronomy is a field concerned with matters very distant from Earth Most phenomena whether observed or theorized transcend human spaces and timescales by orders of magnitude Yet many scientists have been interested not just in the events that have occurred millennia before Earth's inception but also in their very own society here and now Since the first half of the twentieth century an increasing number of them have pursued parallel careers as both academics and activists Besides publishing peer reviewed papers they have promoted a great variety of underrepresented groups within their discipline Through conferences newsletters and social media they have sought to advance the interests of women members of racial and ethnic minorities LGBTQ and disabled people While these activists have differed in the identities they focus on they have come to share a conviction that diversity and inclusion are crucial for scientific excellence as well as social justice In this book you will read of the biographies and institutional contexts of key agents in the diversification of modern astronomy As most are recent figures whose discoveries have not been commemorated by Nobel Prizes they are relatively unknown among historians of science They have however been central to discussions about who has privileged access to the tools of astronomical inquiry including powerful telescopes and extensive databases As such they have also significantly shaped views of our universe **Conflict and Concord** Christopher Isike, Efe Mary Isike, 2022-05-10 The book is a response to the dominant discourse of South Africa as unwelcoming to African immigrants Acknowledging the reality of xenophobia against African migrants in South Africa it explores the positive spaces of interactions between South Africans and African migrants that do not necessarily result in

tension Hence the book is about conviviality cohabitation interdependency and the production of a multicultural rainbow nation South Africa its constitution and representation as a multicultural society is the perfect context to experiment with the ideas in the book Part of the objectives is therefore to demonstrate as contained in the title the ambivalence of this relationship which the popular discourse of xenophobia has silenced
