Unlocking the Mysteries of Genesis Henry M. Morris,2016-08-01 Unlock the Mysteries of Faith and Science Have you wondered how the creation story in Genesis fits with the evolutionary theories of popular science You re not alone Many

Christians wrestle with the seeming disparity between faith and science. They want to believe the inerrancy of Scripture but it is difficult to reconcile the two. *Unlocking the Mysteries of Genesis* seeks to resolve this conflict by answering key questions about the origin of human life, the evidence left by the fossil record, and how the findings of science line up with the Bible. Using the most current research and data, this visually stunning book takes readers on a journey that explores the wonders of God's creation through the lens of faith-based science that clearly points to the authenticity and accuracy of the biblical creation account. The compelling evidence you'll find as you study both Genesis and science will challenge your intellect and reinforce your faith.

Unlocking the Emotional Brain Bruce Ecker, Robin Ticic, Laurel Hulley, 2024-04-22. This highly influential volume, now in a much expanded second edition, delivers major advances for psychotherapy, all empirically grounded in memory reconsolidation neuroscience. A great increase of therapeutic effectiveness can be gained thanks to a clear map of the brain's innate core process of transformational change, a process that does not require use of any particular system or techniques and is therefore remarkably versatile. Twenty-six case examples show the decisive ending of a vast range of major symptoms, including depression, anxiety, panic, shame, self-devaluing, anger, perfectionism, alcohol abuse, sexual aversion, compulsive eating, and obesity, paralyzed self-expression, and teen ADHD, all transformed through deeply resolving underlying disturbances such as complex trauma, lifelong oppression by systemic racism and homophobia, childhood sexual molestation, parental narcissistic domination, violent assault, trauma, natural disaster, trauma, and childhood traumatic aloneness and neglect. This is a transdiagnostic, transtheoretical, lucid understanding of therapeutic action based for the first time in the history of the psychotherapy field on rigorous empirical knowledge of an internal mechanism of change, and it achieves a fundamental unification of the confusingly fragmented psychotherapy field. Diverse systems no longer seem to belong to different worlds because they now form a wonderful repertoire of options for facilitating the same core process of transformational change, as shown in case examples from AEDP, Coherence Therapy, EFT, EMDR, IFS, IPNB, ISTDP, psychedelic-assisted therapy, and SE. It's now clear why therapy systems that differ strikingly in technique and theory can produce the same quality of liberating change. Practitioners who value deep connection with their clients are richly rewarded by the experiential depth that this core process accesses where no awareness had previously reached, whether sessions are done in person or via online video. It is an embarrassment of riches because, in addition, we gain the decisive resolution of several longstanding polarizing debates regarding the nature of symptom production, the prevalence of attachment issues, the operation of traumatic memory, the functions of the client-therapist relationship, the role of emotional arousal in the process of change, and the relative importance of specific versus non-specific factors.
