Lost Tribes Found Matthew W. Dougherty, 2021-06-03 The belief that Native Americans might belong to the fabled lost tribes of Israel Israelites driven from their homeland around 740 BCE took hold among Anglo Americans and Indigenous peoples in the United States during its first half century In *Lost Tribes Found* Matthew W Dougherty explores what this idea can tell us about religious nationalism in early America Some white Protestants Mormons American Jews and Indigenous people constructed nationalist narratives around the then popular idea of Israelite Indians Although these were minority viewpoints they reveal that the story of religion and nationalism in the early United States was more complicated and wide ranging than studies of American chosen ness or manifest destiny suggest Telling stories about Israelite Indians Dougherty argues allowed members of specific communities to understand the expanding United States to envision its transformation and to propose competing forms of sovereignty In these stories both settler and Indigenous intellectuals found biblical explanations for the American empire and its stark racial hierarchy *Lost Tribes Found* goes beyond the legal and political structure of the nineteenth century U S empire In showing how the trope of the Israelite Indian appealed to the emotions that bound together both nations and religious groups the book adds a new dimension and complexity to our understanding of the history and underlying narratives of early America

Hollywood Remembrance and American War

Andrew Rayment, Paul Nadasdy, 2020-08-31 *Hollywood Remembrance and American War* addresses the synergy between Hollywood war films and American forms of war remembrance. Subjecting the notion that war films ought to be considered the war memorials of today to critical scrutiny, the book develops a theoretical understanding of how Hollywood war films as rhetorical sites of remembering and memory reflect, replicate, and resist American modes of remembrance. The authors first develop the framework for and elaborate on the co-evolution of Hollywood war cinema and American war memorialization in the historical, political, and ideological terms of remembrance and the parallel synergistic relationship between the aesthetic and industrial status of Hollywood war cinema and the remembering of American war on film. The chapters then move to analysis of Hollywood war films covering The Great War, World War II, The Korean War, The Vietnam War, The Cold War, and the wars in Afghanistan and Iraq, and critically scrutinize the terms upon which a film could be considered a memorial to the war it represents. Bringing together the fields of film studies and memory studies, this book will be of interest to scholars and students in not just these areas but those in the fields of history, media, and cultural studies more broadly too.

The Wright Flyers 1899-1916 Richard P. Hallion, 2019-12-26 Orville and Wilbur Wright, two bicycle-making brothers from Dayton, Ohio, secured their place as the most famous names in aviation history when on December 17, 1903, they made the first powered, controlled, and sustained heavier-than-air flight. But their success over the cold and windswept Carolina dunes that day has overshadowed their many other accomplishments before and after that historic flight. The Wrights' progression from theory to analysis to ground testing components and wing shapes and then to flight testing kites, gliders, and their first powered aeroplane marked the world's first successful X-Plane research and development programme. They established a template all subsequent aircraft have followed, one still relevant in the era of hypersonic flight and drone research. This book traces the Wright Brothers' story from their first success on that cold December day throughout their glory years to their eventual eclipse by other aviators. It explores in detail the process that led them to their pioneering craft and their many subsequent achievements over the following years and highlights their enduring importance in the age of modern flight.
