research has expanded substantially over the past decade resulting in more than 4 000 hydrate related publications Collating this vast amount of information into one source Clathrate Hydrates of Natural Gases Third Edition presents a thoroughly updated authoritative and comprehensive description of all major aspects of natural gas cla Re-Engineering the Chemical Processing Plant Andrzej Stankiewicz, Jacob A. Moulijn, 2018-12-14 The first guide to compile current research and frontline developments in the science of process intensification PI Re Engineering the Chemical Processing Plant illustrates the design integration and application of PI principles and structures for the development and optimization of chemical and industrial plants This volume updates professionals on emerging PI equipment and methodologies to promote technological advances and operational efficacy in chemical biochemical and engineering environments and presents clear examples illustrating the implementation and application of specific process intensifying equipment and methods in various commercial arenas

Structured Catalysts and Reactors Andrzej Cybulski, Jacob A. Moulijn, 2005-11-02 Interest in structured catalysts is steadily increasing due to the already proven as well as potential advantages of these catalysts Updating the comprehensive coverage of the first edition published in 1998 with the latest science and applications Structured Catalysts and Reactors Second Edition gives detailed information on all aspects of structured catalysts and reactors including materials mass transfer selectivity activity and stability catalyst preparation design and characterization process development modeling and optimization reactor design and operation costs and considerations The book first examines how monolithic catalysts are used to clean exhaust gas from gasoline engines treat industrial off gases burn fuels in commercial settings and synthesize chemicals in two and three phase processes It discusses configurations microstructure physical properties and manufacture of ceramic and metallic monoliths before directing its focus to arranged catalysts and structured packings in terms of mass transfer The book then explores catalytically active membranes and filters featuring metallic membranes permeation mechanisms preparation and modeling commercial membranes and the latest applications such as zeolitic membranes Finally several chapters present techniques for incorporating catalytic species into the structured catalyst support and controlling catalyst nanoporosity This book conveys the scientific as well as economic advantages of using these unconventional catalytic techniques With over 1500 references tables drawings and photographs as well as in depth discussions and a new approach to catalytic processes Structured Catalysts and Reactors Second Edition is an essential reference for anyone working with or studying catalysis
