Urban Alchemy Mindy Thompson Fullilove, 2013-06-04 Investigating urban segregation from a social health perspective the author presents ways to strengthen neighborhood connectivity and empower marginalized communities **"Why We Can't Wait"** Punsalan-Manlimos, Catherine , Sayuki Tiemeier, Tracy, Vasko, Elisabeth T., 2023-05-04 CTS volume 68 explores questions of race and racism in the Church **Communities of Resistance and Resilience in the Post-Industrial City**

Daniel Holland, 2024-08-01 This book is about the grassroots community revitalization movement in Pittsburgh Pennsylvania and Lyon France between 1980 and 2010 an extension of the post WWII civil rights campaign that is rarely considered It tells the story of residents attempts to improve their communities through social capital or people power In positive ways citizens created vibrant attractive neighborhoods But their actions also generated unintended consequences such as high real estate prices and minority displacement that threatened to unravel their hard work Communities of Resistance and Resilience is an ethnographic survey that relies on oral histories archival research on the ground site surveys and the author s personal experience as a neighborhood reinvestment practitioner for more than 30 years It brings to life stories that would otherwise remain obscured such as the lingering impact of the March for Equality and Against Racism organized in Lyon in 1983 and the formation of the Pittsburgh Community Reinvestment Group in Pittsburgh in 1988 both of which launched national movements This is of great use to scholars of transatlantic history as well as a general audience interested in modern social movements in the United States and France **Building the Urban Environment** Harold L Platt, 2015-10 History and critique of post World War II urban planning explores its effects on the environment race labor housing and municipal administration

Business Improvement Districts and the Contradictions of Placemaking Susanna F. Schaller, 2019-07-15 The livable city the creative city and more recently the pop up city have become pervasive monikers that identify a new type of urbanism that has sprung up globally produced and managed by the business improvement district and known colloquially by its acronym BID With this case study Susanna F Schaller draws on more than fifteen years of research to present a direct focused engagement with both the planning history that has shaped Washington D C s segregated landscape and the intricacies of everyday life politics and planning practice as they relate to BIDs Schaller offers a critical unpacking of the BID ethos which draws on the language of economic liberalism individual choice civic engagement localism and grassroots

development to portray itself as color blind democratic and equitable Schaller reveals the contradictions embedded in the BID model For the last thirty years BID advocates have engaged in effective and persuasive storytelling as a result many policy makers and planners perpetuate the BID narrative without examining the institution and the inequities it has wrought as BID urbanism has oiled the urban gentrification machine Schaller sheds light on these oversights thus fostering a critical discussion of BIDs and their collective influence on future urban landscapes **Relics of Modernity** Andrew F.

Place Attachment Lynne C. Manzo, Patrick Devine-Wright, 2013-08-15 Recipient of the 2014 EDRA Achievement Award

Place attachments are emotional bonds that form between people and their physical surroundings. These connections are a powerful aspect of human life that inform our sense of identity, create meaning in our lives, facilitate community, and influence action. Place attachments have bearing on such diverse issues as rootedness and belonging, placemaking and displacement, mobility and migration, intergroup conflict, civic engagement, social housing, and urban redevelopment, natural resource management, and global climate change. In this multidisciplinary book, Manzo and Devine-Wright draw together the latest thinking by leading scholars from around the globe, capturing important advancements in three areas: theory, methods, and application. In a wide range of conceptual and applied ways, the authors critically review and challenge contemporary knowledge, identify significant advances, and point to areas for future research. This volume offers the most current understandings about place attachment, a critical concept for the environmental, social sciences, and placemaking professions.
