Urban America Reconsidered David L. Imbroscio, 2011-01-15 The aftermath of Hurricane Katrina laid bare the tragedy of American cities What the storm revealed about the social conditions in New Orleans shocked many Americans Even more shocking is how widespread these conditions are throughout much of urban America Plagued by ineffectual and inequalitarian governance acute social problems such as extreme poverty and social and economic injustice many American cities suffer a fate similar to that of New Orleans before and after the hurricane Gentrification and corporate redevelopment schemes merely distract from this disturbing reality Compounding this tragedy is a failure in urban analysis and scholarship Little has been offered in the way of solving urban America's problems and much of what has been proposed or practiced remains profoundly misguided in David Imbroscio's view In *Urban America Reconsidered* he offers a timely response He urges a reconsideration of the two reigning orthodoxies in urban studies regime theory which provides an understanding of governance in cities and liberal expansionism which advocates regional policies linking cities to surrounding suburbs Declaring both approaches to be insufficient and sometimes harmful Imbroscio illuminates another path for urban America remaking city economies via an array of local economic alternative development strategies or LEADS Notable LEADS include efforts to build community based development institutions worker owned firms publicly controlled businesses and webs of interdependent entrepreneurial enterprises Equally notable is the innovative use of urban development tools to generate indigenous stable and balanced growth in local economies *Urban America Reconsidered* makes a strong case for the LEADS approach for constructing progressive urban regimes and addressing America's deepest urban problems *Handbook of Urban Politics and Policy* Ronald K. Vogel, 2024-07-05 This authoritative Handbook provides a comprehensive overview of research into urban politics and policy in cities across the globe Leading scholars examine the position of urban politics within political science and analyse the critical approaches and interdisciplinary pressures that are broadening the field

Governing Cities Madeleine Pill, 2021-06-21 In our urban world cities are where most of us experience how our economies and societies are organised and the inequalities which result This textbook introduces ideas theories concepts and examples to help us understand the political and policy challenges of governing cities centred on the principal challenge of how to make our cities more equitable It poses critical questions about how cities are governed by whom according to what values and for whom and draws from a wide range of urban scholarship The how covers urban politics and the policy instruments which result The by whom addresses power relations within and beyond the city and the tensions between different priorities and values The for whom centres equity and the role of citizens and collective action in how we are governed In addressing these questions the book provides an overview of the core theories of urban politics and governance thinks about what happens at different scales and examines new forms of citizen activism which herald alternatives for cities It is a unique introduction to students policymakers and practitioners who want to understand and seek to improve urban politics and policy

The One-Way Street of Integration Edward G. Goetz, 2018-03-15 The One Way Street of Integration examines two contrasting housing policy approaches to achieving racial justice Integration initiatives and community development efforts have been for decades contrasting means of achieving racial equity through housing policy Goetz traces the tensions involved in housing integration and policy to show why he doesn't see the solution to racial injustice as the government moving poor and nonwhite people out of their communities The One Way Street of Integration critiques fair housing integration policies for targeting settlement patterns while ignoring underlying racism and issues of economic and political power Goetz challenges liberal orthodoxy determining that the standard efforts toward integration are unlikely to lead to racial equity or racial justice in American cities In fact in this pursuit it is the community development movement rather than that has the greatest potential for connecting to social change and social justice efforts

in the Time of Obama James DeFilippis, 2016-11-08 With his background as a community organizer and as a state legislator representing Chicago's South Side Barack Obama became America's most urban president since Teddy Roosevelt But what has been his record in dealing with the issues most impacting our metropolitan areas today Looking past the current administration what are the future prospects of the nation's cities and how have they been shaped by our policies in this century Seeking to answer these questions the contributors to *Urban Policy in the Time of Obama* explore a broad range of policy arenas that shape both directly and indirectly metropolitan areas and urbanization processes This volume reveals the Obama administration's surprisingly limited impact on cities through direct policy initiatives such as Strong Cities Strong Communities Promise Neighborhoods and Choice Neighborhood Initiatives There has been greater impact with broader policies that shape urban life and governance including immigration reform education and health care Closing with Cedric Johnson's afterword illuminating the Black Lives Matter movement and what its broader social context says about city governance in our times *Urban Policy in the Time of Obama* finds that most of the dominant policies and policy regimes of recent years have fallen short of easing the ills of America's cities and calls for a more equitable and just urban policy regime Contributors Rachel G Bratt Tufts University Christine Thurlow Brenner University of Massachusetts Boston Karen Chapple University of California Berkeley James Fraser Vanderbilt University Edward G Goetz University of Minnesota Dan Immergluck Georgia Tech Amy T Khare University of Chicago Robert W Lake Rutgers University Pauline Lipman University of Illinois at Chicago Lorraine C Minnite Rutgers University Camden Kathe Newman Rutgers University Deirdre Oakley Georgia State Frances Fox Piven City University of New York Hilary Silver Brown University Janet Smith University of Illinois at Chicago Preston H Smith II Mount Holyoke College Todd Swanstrom University of Missouri St Louis Nik Theodore University of Illinois at Chicago J Phillip Thompson MIT

Neighborhood Decline Ronald van Kempen, Gideon Bolt, Maarten van Ham, 2018-10-18 The global financial and economic crisis that hit the world since 2008 has affected the lives of many people all over the world and resulted in declining incomes rising unemployment foreclosures forced residential moves and cut backs in government expenditure The extent to which the crisis has affected urban neighborhoods and has led to rising intra urban inequalities has not yet received much attention The implemented budget cuts and austerity programs of national and local governments are likely to have hit some neighborhoods more than others The authors of this book which come from a variety of countries and disciplines show that the economic crisis has affected poor neighborhoods more severely than more affluent ones The tendency of the state to retreat from these neighborhoods has negative consequences for their residents and may even nullify the investments that have been made in many poor neighborhoods in the recent past This book was originally published as a special issue of *Urban Geography*

Urban Revitalization Carl Grodach, Renia Ehrenfeucht, 2015-12-22 Following decades of neglect and decline many US cities have undergone a dramatic renaissance From New York to Nashville and Pittsburgh to Portland governments have implemented innovative redevelopment strategies

to adapt to a globally integrated post industrial economy and cope with declining industries tax bases and populations. However despite the prominence of new amenities in revitalized neighborhoods spectacular architectural icons and pedestrian friendly entertainment districts the urban comeback has been highly uneven. Even thriving cities are defined by a bifurcated population of creative class professionals and a low wage low skilled workforce. Many are home to diverse and thriving immigrant communities but also contain economically and socially segregated neighborhoods. They have transformed high profile central city brownfields but many disadvantaged neighborhoods continue to grapple with abandoned and environmentally contaminated sites. As urban cores boom inner ring suburban areas increasingly face mounting problems while other shrinking cities continue to wrestle with long term decline. The Great Recession brought additional challenges to planning and development professionals and community organizations alike as they work to maintain successes and respond to new problems. It is crucial that students of urban revitalization recognize these challenges their impacts on different populations and the implications for crafting effective and equitable revitalization policy. *Urban Revitalization Remaking Cities in a Changing World* will be a guide in this learning process. This textbook will be the first to comprehensively and critically synthesize the successful approaches and pressing challenges involved in urban revitalization. The book is divided into five sections. In the introductory section we set the stage by providing a conceptual framework to understand urban revitalization that links a political economy perspective with an appreciation of socio cultural factors in explaining urban change. Stemming from this we will explain the significance of revitalization and present a summary of the key debates issues and conflicts surrounding revitalization efforts. Section II will examine the historical causes for decline in central city and inner ring suburban areas and shrinking cities and building from the conceptual framework discuss theory useful to explain the factors that shape contemporary revitalization initiatives and outcomes. Section III will introduce students to the analytical techniques and key data sources for urban revitalization planning. Section IV will provide an in depth critical discussion of contemporary urban revitalization policies strategies and projects. This section will offer a rich set of case studies that contextualize key themes and strategic areas across a range of contexts including the urban core central city neighborhoods suburban areas and shrinking cities. Lastly Section V concludes by reflecting on the current state of urban revitalization planning and the emerging challenges the field must face in the future. *Urban Revitalization* will integrate academic and policy research with professional knowledge and techniques. Its key strength will be the combination of a critical examination of best practices and innovative approaches with an overview of the methods used to understand local situations and urban revitalization processes. A unique feature will be chapter specific case studies of contemporary urban revitalization projects and questions geared toward generating classroom discussion around key issues. The book will be written in an accessible style and thoughtfully organized to provide graduate and upper level undergraduate students with a comprehensive resource that will also serve as a reference guide for professionals.
