It has been completely redesigned with an even more accessible layout. The Guide offers updated graphic profiles for all of its bicycle facilities, a subsection on bicycle boulevard planning and design, and a survey of materials used for green color in bikeways. The Guide continues to build upon the fast-changing state of the practice at the local level. It responds to and accelerates innovative street design and practice around the nation. *Urban Bikeway Design Guide, Third Edition* National Association of City Transportation Officials, 2025-01-14

Over a decade ago, the first edition of the NACTO Urban Bikeway Design Guide sparked a design revolution in cities. City streets are now understood as key elements in confronting the intertwined safety, equity, and climate crises in North America. The completely revised and updated third edition of the NACTO Urban Bikeway Design Guide sets a new standard for street design in North America. Developed for cities by cities, the new guide is more than a permission slip for better street design; it is a prescription for safe, connected, equitable bike networks. It captures lessons learned and emerging practices to set a new bar for the design of city streets. The NACTO Urban Bikeway Design Guide Third Edition will help city leaders and street designers meet the needs of our time. New topics address critical gaps in existing guidance for planning and project development. Contextual guidance for bikeway design encompasses the needs of a wider swath of potential riders across genders, ages, races, ethnicities, incomes, and abilities. The guide offers substantive guidance for safe intersection design with a focus on conflict reduction. It is a blueprint for implementing safe, connected, and equitable bike networks. Every transportation professional, from design to maintenance and from field staff to executives, needs a copy for their daily work.

Praise for the second edition: NACTO's Urban Bikeway Design Guide gives American planners and designers the tools they need to make cycling accessible to more people. Janette Sadik Khan, former New York City Transportation Commissioner. This is an extraordinary piece of work that's long overdue. Ray LaHood, former United States Secretary of Transportation. The guide will serve as an essential blueprint for safe, active, multi-modal streets. Gabe Klein, former Chicago Transportation Commissioner. A must-read. Landscape architects, planners, and city officials should find this guide invaluable. Anyone who advocates for increasing bicycle infrastructure in our cities will find many useful tools for implementing best practice.
