Us Heavy Cruisers 1941-45 Pre War Classes New Vanguard:

US Heavy Cruisers 1941-45 Mark Stille, 2014-04-20 Designed and produced under the regulations of the Washington Naval Treaty the heavy cruisers of the Pensacola Northampton Portland New Orleans and Wichita classes were exercises in compromise While they possessed very heavy armament the Pensacolas for example carrying a main battery of ten 8 guns this came at the cost of protection armor was the same thickness as a gun cruiser and incapable of protecting the vessels from enemy 8 fire As the classes evolved these flaws began to be corrected with the main battery being reduced and increased protection being added to the vital areas of the ship Despite these drawbacks the pre war heavy cruiser classes served with distinction throughout World War II

Imperial Japanese Navy Heavy Cruisers 1941-45 Mark Stille, 2012-05-20 Designed with little more than a passing nod to the international naval treaties of the inter war period the Imperial Japanese Navy's heavy cruisers were fast and heavily armed Like the other vessels of the Japanese Navy the heavy cruisers were technologically superior to and far more innovative than their Allied rivals whom they met in many of the major Pacific Theatre battles including Midway and Leyte Gulf Mark Stille continues his study of the IJN of WWII with this fascinating topic addressing the design and development of all 18 ships in the six heavy cruiser classes from pre war construction and mid war alterations to their operational histories and eventual fates

German Heavy Cruisers 1939-45 Gordon Williamson, 2012-04-20 The development of this excellent and successful class of warship only became possible after the Anglo German naval agreement of 1935 eased restrictions on the types of ship Germany could build even then only five of the class were permitted the Admiral Hipper the Blücher the Prinz Eugen the Seydlitz and the Lützow These Cruisers were designed for Atlantic operations and had eight 8 inch guns 12 10 5 cm heavy anti aircraft guns and 17 smaller calibre anti aircraft guns as well as twelve torpedo tubes and their own complement of up to six aircraft This title covers the design development and operational history of the Heavy Cruisers of the Admiral Hipper class

US Navy Light Cruisers 1941-45 Mark Stille, 2016-07-28 During World War II the United States built 72 light cruisers of various classes In response to the severe air threat that surface ships faced new cruisers were designed with increasingly heavy anti aircraft weaponry as well as the traditional 6 inch guns With the speed and range to keep up with aircraft carriers and their considerable anti aircraft capability they were a mainstay of the carrier escorts This book examines every US light cruiser produced including those of the Fargo and Worcester classes which were actually complete after World War II had ended tracing their design development and evolution throughout the war and beyond

Imperial Japanese Navy Light Cruisers 1941-45 Mark Stille, 2012-02-20 The Imperial Japanese Navy went to war with 17 light cruisers and another three cruiser sized training ships Of these most were 5 500 ton ships designed to act as destroyer squadron flagships This made them much different in capabilities and mission from their American counterparts During the war the Japanese built another five light cruisers all but one of which maintained the design premise of being able to serve as destroyer squadron flagships During the war

Japanese light cruisers were active throughout the Pacific performing many missions in addition to their flagship duties Mark Stille continues Osprey's coverage of the IJN of WWII with this concise and complete study of all 25 ships from their design and development to their ultimate fates Detailed Osprey artwork and rare period photographs from the Fukui collection held in Kure Japan illustrate this discussion *US Standard-type Battleships 1941-45* (2) Mark Stille, 2015-12-20 This book completes an authoritative two part study on the Standard type US battleships of World War II ships that were designed to fight a different type of war than the one that unfolded It gives precise technical details of the design history and features of the Tennessee Colorado and the unfinished South Dakota and Lexington classes whilst providing an operational history of the former two Written by a leading expert on the US Navy in World War II and augmented by contemporary photographs and specially commissioned illustrations this is the other half of the story of the US Standard type battleships from the terrible damage they sustained at Pearl Harbor to their support of the war winning landings of the US Marine Corps and US Army

Universal Carrier 1936-48 David Fletcher, 2012-05-20 Featuring specially commissioned artwork a compact guide to this fast lightly armed vehicle developed by the British Army to carry infantry across ground defended by small arms fire specifically the Bren light machine gun This name Bren Gun Carrier would stick with the Universal Carrier and all of its future variants This book examines the Carrier which was employed in a number of roles including carrying ammunition and towing anti aircraft guns and trailers All Allies used the Universal Carrier extensively during practically every World War II campaign By the war's end the Universal Carrier had proved itself to be an invaluable and successful cross country vehicle that was both agile and fast for its time *British Destroyers 1892-1918* Jim Crossley, 2012-02-20 This book recounts the history of the first destroyers of the Royal Navy which revolutionized the way war was fought at sea with new armaments and a great improvement on earlier designs Moreover between 1892 when the first destroyers were laid down and 1918 destroyers evolved radically from 27 knot 250 ton ships into 35 knot 1 530 ton ships All these ships were involved in some form during World War I the smaller original destroyers in an auxiliary support role and the newer larger destroyers at some of the greatest sea battles of the war This account highlights the role the destroyers played in the North Sea during the crucial battles to control the Heligoland Bight as well as the major fleet action at the battle of Jutland in 1916 Complete with a detailed description of the technical evolution of each class of destroyer from the 27 knotters to the Tribal and Marksman classes Jim Crossley offers a complete overview of the vessels that helped to maintain Britain's naval supremacy **British Mark IV Tank** David Fletcher, 2012-05-20 The formidable Mark IV tank was pitted against the German Army from 1917 until the end of World War I This book reveals the important role the tank played in the historic battle of Cambrai in 1917 as well as the first ever tank versus tank actions against German A7Vs It was among the first ever mass produced tank deployed in large numbers on a battlefield In awe of British technology the Germans actively captured salvaged and repaired Mark IVs for deployment against the Allies Using rare photographs and detailed artwork David Fletcher explores the Mark IV's design

and development its variants and accessories and brings to life its exciting deployment on the battlefields of World War I

Modern Israeli Tanks and Infantry Carriers 1985-2004 Marsh Gelbart, 2012-05-20 Over the last two decades of the 20th century the Israel Defence Force IDF introduced a variety of new AFVs Old models such as the M48 and M60 were improved beyond recognition in the form of the Magach 7 The performance of Israel s indigenous Merkava tank was similarly enhanced with new variants and the new Merkava 4 MBT entered service Israeli infantry also received machines such as the Achzarit assault carrier the Puma combat engineer vehicle and the Nagmachon and Nakpadon tank based carriers intended for low intensity conflicts Featuring illustrations this book examines the design modification and combat history of these formidable fighting machines
