Tibet Wild A Naturalists Journeys On The Roof Of The World:

Tibet Wild George B. Schaller, 2012-10-03 As one of the world's leading field biologists George Schaller has spent much of his life traversing wild and isolated places in his quest to understand and conserve threatened species from mountain gorillas in the Virunga to pandas in the Wolong and snow leopards in the Himalaya Throughout his celebrated career Schaller has spent more time in Tibet than in any other part of the world devoting more than thirty years to the wildlife culture and landscapes that captured his heart and continue to compel him to protect them Tibet Wild is Schaller's account of three decades of exploration in the most remote stretches of Tibet the wide sweeping rangelands of the Chang Tang and the hidden canyons and plunging ravines of the southeastern forests As engaging as he is enlightening Schaller illustrates the daily struggles of a field biologist trying to traverse the impenetrable Chang Tang discover the calving grounds of the chiru or Tibetan antelope and understand the movements of the enigmatic snow leopard As changes in the region accelerated over the years with more roads homes and grazing livestock Schaller watched the clash between wildlife and people become more common and more destructive Thus what began as a purely scientific endeavor became a mission to work with local communities regional leaders and national governments to protect the unique ecological richness and culture of the Tibetan Plateau Whether tracking brown bears penning fables about the tiny pika or promoting a conservation preserve that spans the borders of four nations Schaller has pursued his goal with a persistence and good humor that will inform and charm readers Tibet Wild is an intimate journey through the changing wilderness of Tibet guided by the careful gaze and unwavering passion of a life long naturalist

Ecoambiguity, Community, and Development Scott Slovic, Swarnalatha Rangarajan, Vidya Sarveswaran, 2014-02-19 Ecoambiguity Community and Development takes stock of cultural and environmental contexts in many different regions of the world by exploring literature and film Artists and scholars working in the social ecology environmental justice and postcolonial arenas have long recognized that as soon as we tug on a thread of ecodegradation we generally find it linked to some form of cultural oppression The reverse is also often true In the spirit of postcolonial ecocriticism the studies collected by Scott Slovic R Swarnalatha and Vidya Sarveswaran emphasize the impossibility of disentangling environmental and cultural problems While not all the authors explicitly invoke Karen Thornber s term ecoambiguity or the concepts and terminology of postcolonial ecocriticism their articles frequently bring to light various ironies For example the fact that Ukrainian environmental experience in the twenty first century is defined by one of the world s most infamous industrial disasters the Chernobyl nuclear accident of 1986 yet Ukrainian culture like many throughout the world actually cherishes a profound even animistic attachment to the wonders of nature The repetition of this and other paradoxes in human cultural responses to the more than human world reinforces our sense of the congruities and idiosyncrasies of human culture Every human culture regardless of its condition of economic and industrial development has produced its own version of environmental literature and art but the nuances of this work reflect that culture s precise social and geophysical circumstances In various ways these stories of community and development from across the planet converge and diverge as told and explained by distinguished scholars many of whom come from the cultures represented in these articles The

Saving Endangered Species Robert W. Shumaker, 2020-10-27 The amazing true stories of the greatest wildlife champions of our time Wildlife conservation is at a critical juncture While large charismatic mammals may be the first animals that come to mind the mere 3 000 wild tigers still in existence the giraffes declared endangered for the first time just last year it is not only these magnificent keystone species disappearing A full third of all studied birds reptiles and mammals have suffered devastating population losses and a third of all insects are now endangered including crucial pollinators that sustain worldwide food supply Over 15 000 animal species are now considered to be threatened with extinction There are however bright spots that provide optimism many of them due to the efforts of a small group of scientists and activists In Saving Endangered Species Robert W Shumaker brings together ten conservation heroes seven of them winners of the Indianapolis Prize three of them recipients of the Jane Alexander Global Wildlife Ambassador Award With moving immediacy each wildlife defender offers their unique perspective on the state of wildlife conservation and the future of the natural world Bringing to life their work in the field each contributor also explains key concepts in wildlife conservation reveals why they are important and discusses what kinds of work can be done to address biodiversity loss Contributors sharing their stories in their own words include George Schaller one of the founding fathers of wildlife conservation who conducted the field work that resulted in the establishment of the world's largest wildlife preserve the Arctic National Wildlife Refuge Iain Douglas Hamilton who is widely credited with developing the metrics and methods that stemmed the tide of elephant poaching for ivory in Africa Steven Amstrup who discovered the disturbing truth that the sea ice polar bears rely on for traveling hunting and raising their young was disappearing Russell Mittermeier who has

discovered over 20 new animal species conducted field work in more than 30 countries around the globe and authored 15 books on biodiversity Harrison Ford Academy Award winning actor who has been a passionate wildlife advocate and board member of Conservation International for over 25 years Sigourney Weaver three time Academy Award nominee whose work with the Dian Fossey Gorilla Fund has helped save thousands of gorillas in Rwanda and Congo This unique book aims to win new recruits inspire biologists and conservationists already in the field and illustrate the profession's fundamental scientific tenets through wildlife champions' own exciting narratives Covering issues from reproduction and prey predator relationships to population dynamics and community engagement Saving Endangered Species also addresses such thorny topics as overhunting retaliatory killing by farmers development driven habitat loss and the illegal wildlife trade By encompassing a broad spectrum of subjects this volume ultimately gives readers a first person look into what it takes to dedicate oneself to the crucial field of wildlife conservation Contributors Jane Alexander Steven C Amstrup George Archibald Michael I Crowther Iain Douglas Hamilton Harrison Ford Carl Jones Russell Mittermeier George B Schaller Robert W Shumaker Sigourney Weaver Patricia Chapple Wright The Extinction Market Vanda Felbab Brown, 2017-11-15 Emphasizes the disturbing consequences poaching and trafficking pose globally in terms of both biodiversity and public health **On the Prowl** Mark Hallett, John M. Harris, 2020-06-02 Big cats such as lions tigers leopards and jaguars fascinate us like few other creatures They are enduring symbols of natural majesty and power Yet despite the magnetic appeal of the big cats their origins and evolutionary history remain poorly understood and human activity threatens to put an end to the big cats' glory On the Prowl is a fully illustrated and approachable guide to the evolution of the big cats and what it portends for their conservation today Mark Hallett and John M Harris trace the origins of these iconic carnivores venturing down the evolutionary pathways that produced the diversity of big cat species that have walked the earth They place the evolution and paleobiology of these species in the context of ancient ecosystems and climates explaining what made big cats such efficient predators and analyzing their competition with other animals Hallett and Harris pay close attention to human impact from the evidence of cave paintings and analysis of ancient extinctions up to present day crises Their engaging and carefully documented account is brought to life through Hallett's detailed vivid illustrations based on the most recent research by leading paleontologists Offering a fresh look at the rise of these majestic animals On the Prowl also makes a powerful case for renewed efforts to protect big cats and their habitats before it is too late The Zoomorphic Imagination in Chinese Art and Culture Jerome Silbergeld, Eugene Y. Wang, 2016-10-31 China has an age old zoomorphic tradition The First Emperor was famously said to have had the heart of a tiger and a wolf The names of foreign tribes were traditionally written with characters that included animal radicals In modern times the communist government frequently referred to Nationalists as running dogs and President Xi Jinping vowing to quell corruption at all levels pledged to capture both the tigers and the flies Splendidly illustrated with works ranging from Bronze Age vessels to twentieth century conceptual pieces this volume is a wide ranging

look at zoomorphic and anthropomorphic imagery in Chinese art The contributors leading scholars in Chinese art history and related fields consider depictions of animals not as simple one for one symbolic equivalents they pursue in depth in complexity and in multiple dimensions the ways that Chinese have used animals from earliest times to the present day to represent and rhetorically stage complex ideas about the world around them examining what this means about China past and present In each chapter a specific example or theme based on real or mythic creatures is derived from religious political or other sources providing the detailed and learned examination needed to understand the means by which such imagery was embedded in Chinese cultural life Bronze Age taotie motifs calendrical animals zoomorphic modes in Tantric Buddhist art Song dragons and their painters animal rebuses Heaven sent auspicious horses and foreign sent tribute giraffes the fantastic specimens depicted in the Qing Manual of Sea Oddities the weirdly indeterminate creatures found in the contemporary art of Huang Yong Ping these and other notable examples reveal Chinese attitudes over time toward the animal realm explore Chinese psychology and patterns of imagination and explain some of the critical means and motives of Chinese visual culture The Zoomorphic Imagination in Chinese Art and Culture will find a ready audience among East Asian art and visual culture specialists and those with an interest in literary or visual rhetoric Contributors Sarah Allan Qianshen Bai Susan Bush Daniel Greenberg Carmelita Carma Hinton Judy Chungwa Ho Kristina Kleutghen Kathlyn Liscomb Jennifer Purtle Jerome Silbergeld Henrik S rensen and Eugene Y Wang Ethnic Groups of North, East, and Central Asia James B. Minahan, 2014-02-10 Covering countries ranging from Afghanistan and China to Kazakhstan and Russia this encyclopedia supplies detailed information and informed perspectives enabling readers to comprehend Asian ethnic groups as well as Asian politics and history Asia is quickly becoming one of the most important regions of the world culturally economically and politically This work provides encyclopedic coverage of a wide array of Central North and East Asian ethnic groups including those in eastern Russia Kazakhstan Uzbekistan Kyrgyzstan Turkmenistan Tajikistan Afghanistan China Taiwan Japan and the Koreas Arranged alphabetically by ethnic group each entry provides an overview of the group that identifies its major population centers and population primary languages and religions parallels with other groups origins and early development major historic events and cultural belief systems Information on each group s typical ways of life relations with neighboring groups politics and recent history notable challenges demographic trends and key figures is also included Special attention is focused on the numerous ethnic groups that make up China one of the world s most populated countries Sidebars throughout the text provide fascinating facts and information about specific groups to make the encyclopedia more accessible and appealing while Further Reading sections at the end of each entry and the bibliography will provide ample additional resources for students performing in depth research **Extreme Conservation** Joel Berger, 2018-08-02 Extraordinary Berger is a hero of biology who deserves the highest honors that science can bestow Tim Flannery New York Review of Books On the Tibetan Plateau there are wild yaks with blood cells thinner than those of horses by half enabling the endangered

yaks to survive at 40 below zero and in the lowest oxygen levels of the mountaintops But climate change is causing the snow patterns here to shift and with the snows the entire ecosystem Food and water are vaporizing in this warming environment and these beasts of ice and thin air are extraordinarily ill equipped for the change A journey into some of the most forbidding landscapes on earth Joel Berger's *Extreme Conservation* is an eye opening steely look at what it takes for animals like these to live at the edges of existence But more than this it is a revealing exploration of how climate change and people are affecting even the most far flung niches of our planet Berger's quest to understand these creatures struggles takes him to some of the most remote corners and peaks of the globe across Arctic tundra and the frozen Chukchi Sea to study muskoxen into the Bhutanese Himalayas to follow the rarely sighted takin and through the Gobi Desert to track the proboscis swinging saiga Known as much for his rigorous scientific methods of developing solutions to conservation challenges as for his penchant for donning moose and polar bear costumes to understand the mindsets of his subjects more closely Berger is a guide par excellence He is a scientist and storyteller who has made his life working with desert nomads in zones that typically require Sherpas and oxygen canisters Recounting animals as charismatic as their landscapes are extreme Berger's unforgettable tale carries us with humor and expertise to the ends of the earth and back But as his adventures show the more adapted a species has become to its particular ecological niche the more devastating climate change can be Life at the extremes is more challenging than ever and the need for action for solutions has never been greater

Mapping Transition in the Pamirs Hermann Kreutzmann, Teiji Watanabe, 2016-01-25 By emphasizing on the Pamir region a comprehensive overview of path dependent and recent developments in a remote mountain region is provided in this book Overall neglect in the mountainous periphery is contrasted by shifting the centre of attention to the Pamirs situated at the interface between South and Central Asia From colonial times to now there has been a debate on grasping and locating the area Here field work based contributions are collected to provide a variety of perspectives on the Pamirs highlighting transformation and transition in Post Soviet societies as well as in Afghanistan and Pakistan The similar ecological environment across borders features the common ground while analyzing development processes in a set of case studies that aim at highlighting certain aspects of regional development

Snow Leopards, 2023-10-12 *Snow Leopards Second Edition* provides a foundational comprehensive overview of the biology ecology and conservation of this iconic species This updated edition incorporates all the recent information from range wide surveys and conservation projects the results of technical and advances particularly in genetics camera trapping and satellite tracking and evaluates emerging threats New chapters synthesize the novel scientific methods and statistical analyses used to develop density and population estimates and how they inform conservation and management estimates Sections cover historical information the main biogeographic patterns evolutionary trends conservational efforts and cultural significance Status and distribution are fully updated for all 12 countries where snow leopards occur Other sections describe established and emerging threats including human wildlife conflict illegal trade

infrastructure development and climate change along with conservation solutions used to address these threats The book concludes with a final section on global snow leopard initiatives and future potentials Offers a complete and thorough update on snow leopard ecology conservation research techniques and population trends among other topic Presents the results of the latest scientific research and conservation measures Edited by recognized experts with contributions from 240 of the world s leading experts throughout the snow leopard s range
